

**Cazzuole - Frattoni - Attrezzi per Muratori
Trowels - Plastering Trowels - Masonry Tools**

50 ANNI 1957-2007

L'IMPRESA

Battiferro di Maniago S.n.c. è una ditta italiana che produce utensili per l'edilizia e opera da decenni sul mercato internazionale. Fu fondata sotto l'attuale denominazione nel 1957, ma il fondatore, Toni d'Avian Beltrame, lavorava nella industria manifatturiera per l'edilizia dall'inizio degli anni Venti. Allora le macchine utensili che sono oggi di uso corrente non erano ancora diffuse e ci si affidava perciò esclusivamente al lavoro manuale. Negli anni Sessanta la Battiferro incominciò la sua espansione in campo internazionale quando Emilio Beltrame assunse la dirigenza dell'azienda. Nel corso degli anni la Battiferro si è sempre mantenuta al passo con le mutevoli e sempre aggiornate tecniche manifatturiere usando macchine utensili sempre più efficienti ed autonome. Nel 1990 il figlio Antonio Beltrame si unì all'attività familiare imparando tutti i segreti nel campo della produzione delle cazzuole. Ora la terza generazione dei Beltrame sta assumendo la direzione dell'attività con la stesso impegno per continuare ad offrire ai nostri clienti il miglior prodotto possibile.

I PRODOTTI

Fra i prodotti della Battiferro ci sono cazzuole e frattazzi in numerosi modelli, utensili per scultori e per stuccature, frattazzi in gomma, spugna e spatole di vario genere. A partire dal processo produttivo delle origini, la ditta si è evoluta sia per far fronte al crescente volume d'affari, sia per sfruttare le più recenti innovazioni tecniche offerte dalle macchine a controllo computerizzato. Questo non significa che la Battiferro abbia rinunciato a controllare scrupolosamente la riuscita finale di ognuno dei suoi prodotti.

LE CARATTERISTICHE

L'alta qualità della gamma utensili della Battiferro è la ragione principale del suo successo. Le vendite delle cazzuole forgiate, che costituiscono il prodotto più diffuso della Battiferro, non sono mai diminuite nonostante il mercato sia sempre più attento ai prezzi. Questo perché la qualità costa, ma la qualità paga: i prodotti che si trovano vicini all'estremo inferiore dell'intervallo prezzi non hanno neanche la metà della durata delle cazzuole forgiate. Per quanto concerne invece la gamma delle saldate, esse possiedono sia il solido aspetto delle forgiate, sia il vantaggio di un prezzo inferiore.

IL MERCATO

Fin dalle sue origini, la Battiferro ha sempre venduto la maggior parte dei suoi prodotti sul mercato internazionale, dall'Australia al Medio Oriente, dall'Europa agli Stati Uniti. Per questa ragione essa ha una notevole esperienza sui modelli propri di molti mercati nazionali.

THE COMPANY

Battiferro di Maniago S.n.c. is an Italian manufacturer of construction tools that has been operating on the international market for decades. It was established with its current name in 1957, although the founder, Toni d'Avian Beltrame, had been working in the construction tools business from the early twenties. At that time the now widely spread manufacturing machines were not yet in use, and one had to rely solely on hand work. In 1960 Battiferro started his commercial expansion in the international market when Emilio Beltrame began manage the firm. During the years Battiferro has always kept up the pace with the changing and always up to date manufacturing techniques using always more efficient automatic machinery. In 1990, son Antonio Beltrame joined the family business to learn all secrets of the trowels' manufacturing process. Now the third generation of Beltrame is taking command of the business with the same dedication to serve our customers with the best products possible.

PRODUCTS

The company's product include brick trowels and plastering trowels in several patterns, floats and ornamental tools, putty knives and scrapers. The company's range has been evolving in order to cope with different customer demands and wider market areas. The recently automated production of welded brick trowels has been created with the aim of countering (although on a higher quality level) the commercial onset of the Far East. This does not mean that Battiferro has renounced paying attention to the final outcome of each of its products.

CHARACTERISTICS

The very high quality of Battiferro's range of tools is the main reason of its success. The sales of solid forged trowels, that are Battiferro's most widespread product, never decreased in spite of a market that is increasingly keen on prices. This is because quality costs, but it also lasts: products at the lower end of the price range do not have even half the durability and pliability of solid forged trowels. As for the welded brick trowels, they combine the compact outlook of forged brick trowels with the benefit of a lower price.

MARKET

Ever since it came into existence, the company has been selling most of this products on the international market, from Australia to the Middle East and from Europe to the United States. For this reason, it has a wide experience on the specific tool models that are sold on many national markets.
