

# ADRIATECH

## SSCW Equipment

Unmatched combination of exceptional design and premium technologies for faster return on investment and higher profitability per square meter.

2023

AT

## Every single square matters. In the car washing business, every single square meter is **essential**.

Equipping the car wash with Adriateh's additional equipment and peripherals is the fastest and most effective way to increase revenue per square meter.

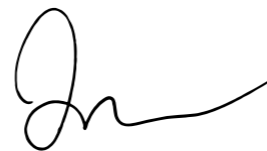

In a competitive business environment, every advantage counts. For businesses that are limited by the size of their lot, such as self-service car wash stations, the importance of every single square meter cannot be overstated. In fact, it can be the difference between success and failure.

Adriateh's equipment is a perfect complement to car washes. It saves space and allows owners to generate higher revenue, achieve better ROI, and increase profitability per square meter. Car wash owners are not the only ones who will benefit. The multifunctional equipment will also delight car wash customers, who will be able to clean their vehicles faster and more easily.

By providing a superior car washing experience, these businesses can enhance their reputation and attract a loyal customer base.

The equipment we developed in our own research and development center has been proven in practice at over 1000 locations in 40 countries. It enables owners to achieve higher revenue, and provides customers with a better washing experience.

We are confident that it can improve your business as well.

Our **Stekerr P2** EV charging station is the winner of the **iF Design Award 2023**

## Additional equipment - a series of outstanding devices for higher profitability of the car wash **wash station**

The effectiveness of our devices has been proven through thousands of car washes in more than 40 countries.

Offer them additional services and the process of washing and cleaning vehicles will not end with the final rinse and exit from the wash bay. On the contrary - that is the moment when the second phase of vehicle cleaning can begin.

With that in mind, Adriateh has designed and produced a series of outstanding devices that will provide your car wash with additional revenue streams and help you shorten the return on investment. The possibilities for treating vehicles after washing are numerous - from vacuuming and chemical cleaning of the interior to applying tire shine or topping up windshield washer fluid.

The flagship of our line of additional equipment are multifunctional devices with multiple functions in one housing. This is precisely the feature that will dramatically increase the profitability per square meter of your business.

# Multiqe Maxi<sup>TM</sup> Series

Maxi version of our best-selling machine! As much as 5 functions in a single robust stainless steel housing.

The latest addition to the Multiqe series is versatile and multifunctional, just like its smaller siblings. With up to five different functions in a robust stainless steel housing, color touchscreen, and compatibility with all payment methods.

Although it's the Maxi version, rest assured that this Multiqe will save you space, provide a high ROI, and increase profitability per square meter.
