

# FLEXIBLE STRETCH WRAPPING MACHINE

## The correct answer to your question :

- *PACKING PERFORMANCES : quality stretch wrapping and cycle times.*
- *FLEXIBILITY : Big and small packs wrapping with one automatic machine.*
- *REDUCED INTEGRATION. SURFACE*
- *SMART AND OPENED control programs*

## Packing performances :

- Fully automatic process.
- 300% stretch possibility
- Double stretching head in option.

## Opened Control Programs:

- All parameters can be controlled and modified by yourself,
- Unlimited packing recipes,
- Previous studies will be proposed to get your best solution.
- Expert system principle.

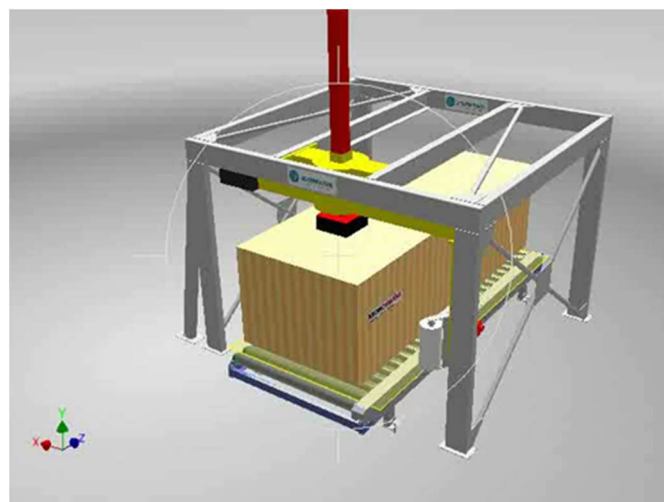

## Flexibility :

- Rotating movements for the packing of small products  
(Products up to 1200 x 1200 mm)
- Combined rotating and linear movement for the packing of big packs  
(until 6000x2000mm)

## Easy Integration in your lines :

- Small arm: Small machine width
- Easy integration in all types of production lines.

STACK DIMENSIONS	
Length :	From 550 to 5720 mm
Width :	From 320 to 2200 mm
Height :	290 to 2000 mm
TECHNICAL FEATURES	
Output capacities :	≈ 10 to 30 stacks per hours
FOIL FEATURES	
Foil type :	PE stretch foil
Foil Thickness :	17 – 30 µm

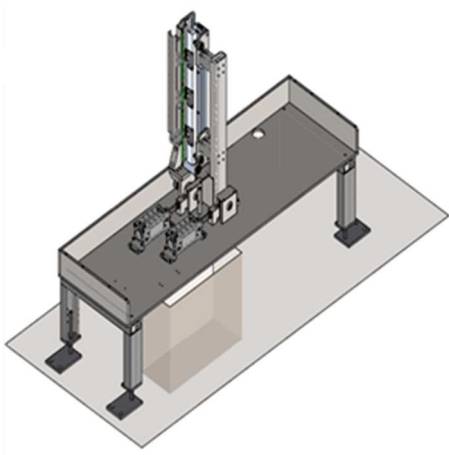

**Products—Foil needs to be tested for a safe reason of your packing process definition**

## Automatic hooking, welding and cutting Tool :

## 0 to 300% pre-stretching Tool :
