

Concrete Mixing bucket

Construction machinery as mobile concrete plant

Concrete mixing bucket

The best quality of the concrete with Cross mixing system – patent No.21315

Forced mixing of the concrete / Lower energy consumption till 30% /
Faster mixing time till 30%

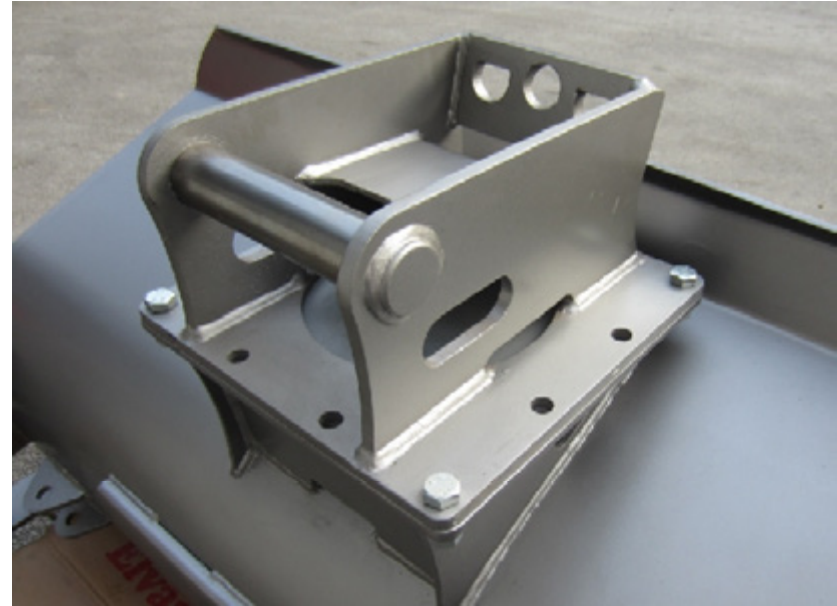

Superior mixing system – Cross Mixing system

The best quality concrete with the Modularis mixing bucket

**Safety valve on the hydromotor
protect the drive and increase
the life time**

**Changeable connection plate for
all possible machines**

Mixing the concrete with the working machines on a construction site, in & out of the town, in the forest, on the farm, in the hills and mountains

With the Concrete Mixing Bucket

Maintenance of roads, concrete canals, of shafts and culverts

Excellent usability and flexibility with the Mini excavators & skid steer loaders & Tractors

Mixing of the concrete and distribution of concrete at high places

Usage on Telehandlers and forklift trucks

Concrete mixing bucket

adaptable to the all working machines

Anywhere / Anytime / when we need the concrete / As many as we need it

Concrete mixing bucket

adaptable for the all tractors

Concrete mixing bucket adaptable for the all tractors

Concrete mixing bucket

adaptable for the all tractors

Adaptable for JCB machines

Adaptable for JCB machines

Adaptable for Cat machines

CATERPILLAR®

Adaptable for Terex machines

Adaptable for Terex machines

**Adaptable for Volvo
machines**

VOLVO

Construction Equipment

Adaptable for Komatsu machines

KOMATSU[®]

Adaptable for Komatsu machines

KOMATSU[®]

Concrete Mixing bucket

With the best mixing performance “Cross mixing system”

20 years experience in production of mixing bucket - 2 years warranty
