Datasheet

24 Port Gigabit Network Switch

RS Stock number [794-7054](#)

Description:

The NLHUB-594A is a 24 port Ethernet switch. This product would be ideal at the heart of all networking systems with its fast speeds of 10/100/1000Mbps. The NLHUB-594A comes with a standard 1U 19-inch rack mountable steel case which enables an optimum number of ports while only taking up minimal space.

Specification:

- 24 Port 10/100/1000 Mbps TX Auto Negotiation Ethernet Switch
- Unmanaged

Compliant with IEEE802.3 10Base-T Ethernet, IEEE802.3u 100Base-Tx, IEEE802.3ab 1000Base-T

- 32/48 Switching Capacity
- Full/Half Duplex capability on each TX port (Full Duplex only supported in 1000Mbps network)
- IEEE802.3x standard flow control for Full Duplex, optional back pressure function for Half Duplex
- Supports TP interface Auto MDIX function for auto TX/RX swap
- Supports 8K MAC address table
- LED indicators for simple diagnostics and management

Contents

- 24 Port Gigabit Switch
- Power Cable
- Rack Mount Brackets
- Rubber Feet
