

Crusher and mulcher for Excavators 10 - 25 t

PTH Excavator Crusher EC-L

The PTH Excavator Crusher is the ideal combination of stone crusher & mulcher for a wide range of applications such as stone milling, forestry mulching, bench cutting or embankment maintenance.

The machine attached on excavators convinces with the technology of the big stone crushers and best performance together with massive construction for work also in hardest stone.

min. 100 l/min
250 - 360 bar

Standard features	Technical details	1150	1400
+ Carbide-tipped fixed special tools	Number of tools - pcs.	32	36
+ Tool spec stone crusher, forestry mulcher or universal	required output min.	100 l/min.	120 l/min.
+ Inner armouring made of HARDOX steel changeable	Pressure	250-360 bar	250-360 bar
+ Rotor with overlapping tool arrangement	Drive	one side with 6 high-performance V-belts	
+ Low wear on the tool holders	Dead weight approx.	620 kg	720 kg
+ Breaking (crushing) and mulching function	Working width	1.150 mm	1.400 mm
+ Trap door hydraulically adjustable	Overall width	1.370 mm	1.590 mm
+ Front lid hydraulically adjustable	Working depth	max. 150 mm	
	Crushing stage	HARDOX steel, mechanically adjustable	

Special equipment

- Adapter plate for excavator
- Elevated skid shoes
- Support roller for exact height guidance and recompression
- Rotator and/or Power tilt plate
- Hydraulic control block for 3 functions
- PTH Tronic MIC 4.0 linkable
