GÖRMACH

... ABOUT ANCIENT

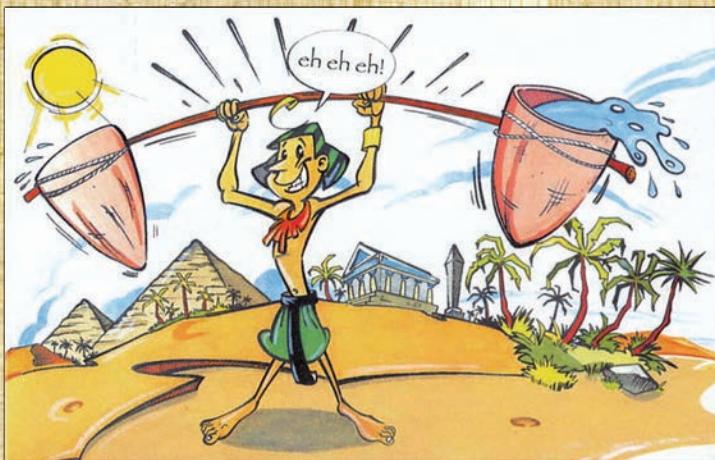

EGYPT MANUSCRIPTS

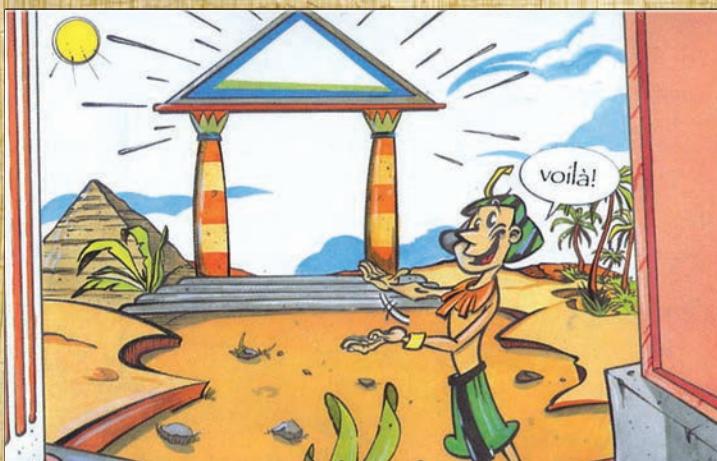

PHARAOH CORMSES, YEARS LATER, DREAMED THE SAME DREAM, OF THE BIGGEST PYRAMID BEING HIS OWN.

"Here is the solution:
Cormach system whit roller bearing
faster and more efficient."

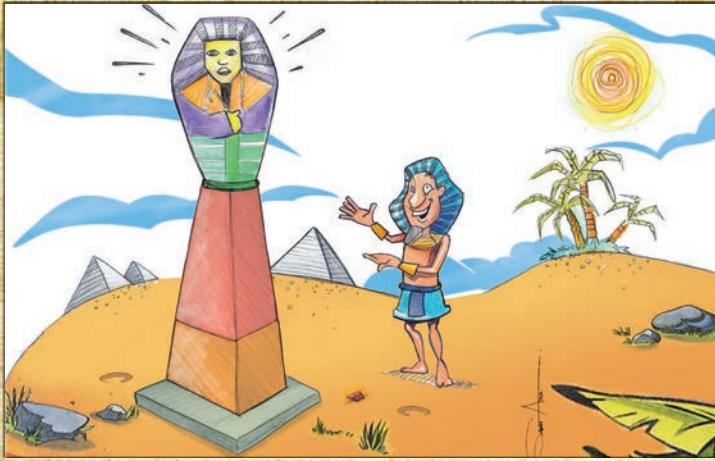

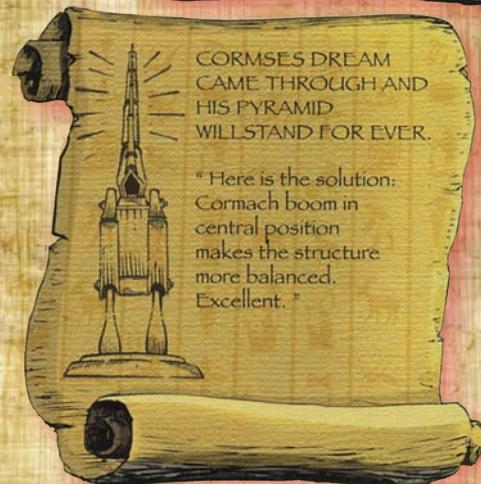

BEING OLD HE DECIDED TO FINISH KRANKAMON WORK, BUT THE NEEDED SOMETHING TO SPEED THE WORK UP.

"Here is the solution:
Cormach system whit
double mast and
double lifting
cylinders."

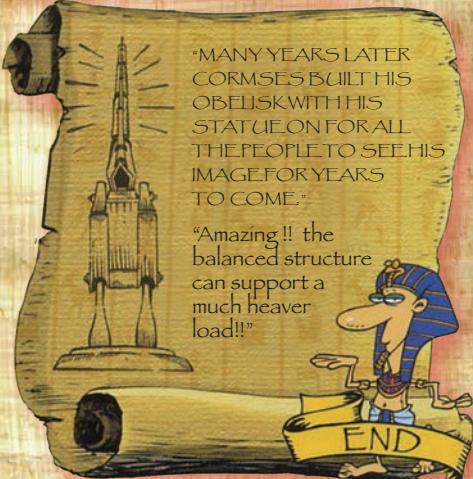

CORMSES DREAM CAME THROUGH AND HIS PYRAMID WILL STAND FOR EVER.

"Here is the solution:
Cormach boom in central position makes the structure more balanced.
Excellent."

"MANY YEARS LATER CORMSES BUILT HIS OBELISK WITH HIS STATUE ON FOR ALL THE PEOPLE TO SEE HIS IMAGE FOR YEARS TO COME."

"Amazing !! the balanced structure can support a much heavier load!!"

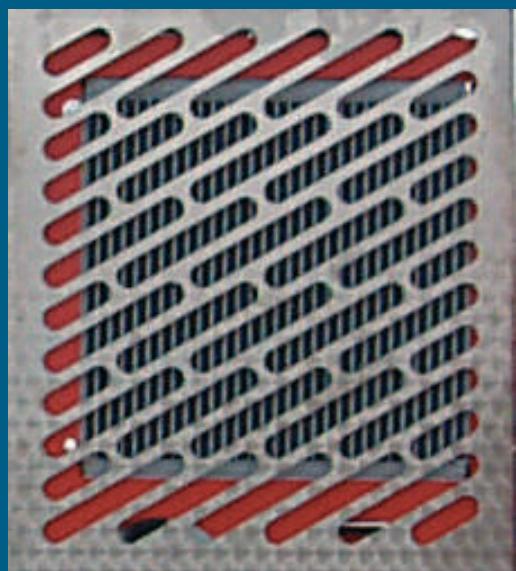

END

LAMIERE
 Le gru CORMACH sono realizzate utilizzando lamiere ad altissima resistenza con tensione minima di snervamento, in funzione del modello, che può raggiungere i 1300 N*mm2.
STEEL PLATES
 CORMACH crane are produced using steel plates with high resistance with minimum yielding stress specific for each Model that can reach 1300 N*mm2.

TOLES D'ACIER
 Les grues CORMACH sont produites en utilisant des toles d'acier avec haut resistance avec tension de déformation minimune spécifique pour chaque Modèle que peut arriver à 1300 N*mm2.

STAHLKONSTRUKTION
 Das Stahlgerüst von CORMACH Kranen sind von extreme hoher Belastung bei minimalem Eigengewicht. Je nach Modell wird ein Gewicht von 1300 N*mm2 erreicht.

Ralla di Ø Maggiore rispetto alla concorrenza = Migliore distribuzione dei carichi
 Slew bearing with bigger Ø than the competition = Better distribution of the stresses
 Drehkranz mit einem größeren Ø als Wettbewerb = Bessere Verteilung der Belastung
 Couronne avec Ø plus important de la concurrence = plus correcte distribution de stress

Aggancio/Sgancio rapido JIB
 Quick connection and disconnection of the JIB
 Connexion rapide de JIB
 Schnellkupplung des Jib (für die Hydraulik: hydraulische Schnellkupplung)
 Enganche/desenganche rápido del JIB

CORMACH È AMICA DELL'AMBIENTE: UTILIZZO DI VERNICI ALL'ACQUA E POMPE A PORTATA VARIABILE.

Con l'utilizzo di prodotti di verniciatura all'acqua, la CORMACH può vantare un ciclo di verniciatura completamente ecologico e rispettoso dell'ambiente. Siamo infatti riusciti a ridurre le emissioni nell'atmosfera di circa il 90% grazie all'utilizzo di questa tecnologia all'avanguardia. Attualmente il ciclo di verniciatura utilizzato dalla CORMACH può vantare migliori prestazioni di protezione, resistenza, aspetto estetico e d'impatto d'ambientale.

I vantaggi migliori per l'utilizzo dei prodotti di verniciatura ad acqua sono:

• Impatto ambientale ridotto

Utilizzare vernici all'acqua significa ridurre il grave problema collegato all'emissione nell'ambiente di solventi e sostanze inquinanti

• Pericolosità ridotta

Le vernici all'acqua sono esenti da sostanze infiammabili, rendendole innocue per l'operatore e per la loro conservazione in magazzino.

Le moderne gru di portata elevata, con sbracci notevoli, necessitano di un controllo molto preciso dei movimenti; pertanto vengono impiegate valvole distributrici di tipo proporzionale che erogano una portata d'olio in proporzione all'ampiezza del comando ricevuto.

La pompa a cilindrata variabile, eroga una portata che varia, in funzione di una differenza di pressione costante tra la pompa stessa e l'utenza, attraverso un segnale di pilotaggio proveniente dalla valvola distributrice. Durante il funzionamento a vuoto la pompa si posiziona nella cilindrata 0. Durante le manovre a vuoto o con carico, la pompa eroga esclusivamente la portata richiesta.

L'ottimizzazione della portata permette quindi un minor consumo di carburante, minori emissioni in atmosfera ed un notevole risparmio economico dovuto ai minori consumi.

CORMACH PRODUCTS ARE ENVIRONMENTALLY FRIENDLY WITH THE USE OF WATER BASED PAINTS AND PISTON PUMPS WITH VARIABLE DISPLACEMENT

CORMACH S.r.L., has been implementing a water base colours painting system and therefore can claim an ecologic and environment friendly painting cycle. In fact CORMACH has been able to reduce by 90% the emission of polluting substances into the atmosphere. The painting cycle adopted by CORMACH can claim the best ratio between protection, resistance, aesthetic and ambient impact.

The main advantages arising from the use water base paint are:

- Low environmental impact, the use of water-based paints contains the emission in the atmosphere of solvents and other polluting substances.
- Lowers the danger, considering the water-based paints are not flammable, reducing therefore the danger level for the user and for the stocking.

The new generation of heavy lifting cranes with long booms, need a very precise control of the movements, therefore they are equipped with proportional control valves, valves that supply a quantity of oil that is proportional to the magnitude of the activation of the different functions.

The variable displacement pump, supplies a variable flow, in function of a difference of pressure, constant between the pump itself and the activated function, through a piloting signal that comes from the control valve. When the crane runs at idle the pump positions itself on displacement 0. When a function is activated, with or without load, the pump delivers only the required flow.

Optimizing the oil flow reduces costs by reducing fuel consumption also lowering emissions to the atmosphere.

CORMACH EST SOUCIEUX DE L'ENVIRONNEMENT EN UTILISANT DES PEINTURES A L'EAU ET DES POMPES A DEBIT VARIABLE

CORMACH est aussi une société soucieuse de l'environnement. L'utilisation de peintures écologiques permet de réduire de 90% les émissions de COV dans l'atmosphère. Notre chaîne de peinture entièrement robotisée nous permet en flux continu de réaliser les étapes de grenaillage, application de l'apprêt, peinture, séchage, permettant d'obtenir une qualité optimale en terme de protection et de finition.

Les avantages majeurs de la peinture à l'eau sont:

- Un impact environnemental faible: Une réduction des émissions de solvants et de substances polluantes dans l'environnement.
- Protection des opérateurs et sécurité de stockage : Les peintures à l'eau ne contiennent pas de substances inflammables.

Les grues de nouvelle génération de capacité élevée, avec très de très long bras, ont besoin d'un contrôle très précis des mouvements. Pour le garantir on utilise des distributeurs proportionnels avec un débit d'huile proportionné à la commande sélectionnée.

La pompe à débit variable distribue un débit qui

change en fonction de la différence de pression constante entre la pompe et le mouvement, par un signal de pilotage qui vient de la soupape de distribution. Sans l'utilisation de la grue, la pompe est positionnée sur la cylindrée 0. Pendant les manœuvres à vide ou avec la charge, la pompe débite seulement le débit demandé. L'optimisation du débit permet donc une économie de carburant et réduit les émissions polluantes dans l'atmosphère.

CORMACH IST UMWELTFREUNDLICH: EINSATZ VON LACKEN AUF WASSERBASIS UND VON HYDRAULISCHEN VERSTELLPUMPEN

CORMACH S.r.L. hat eine Lackieranlage für Lacke auf Wasserbasis in Betrieb genommen und kann daher einen ökologischen und umweltfreundlichen Lackierzyklus bieten. Tatsächlich war CORMACH in der Lage, die Emission von Feinstaub und anderen schädlichen Substanzen um ca. 90% zu reduzieren. Der von CORMACH eingesetzte Lackierzyklus liefert das beste Verhältnis zwischen Schutz, Widerstandsfähigkeit, Ästhetik und Umwelteinfluss.

Die Hauptvorteile der Lackierung auf Wasserbasis sind:

- Geringerer Umwelteinfluss, der Einsatz von wasserlöslichen Lacken verhindert die Emission von Lösemitteln und anderen gefährlichen Substanzen.
- Verminderung von Gefahren, da Lacke auf Wasserbasis nicht entzündlich sind und damit die Risiken bei Lagerhaltung und Anwendung wesentlich geringer sind.

Die neue Generation der Schwerlastkrane mit langen Teleskoparmen benötigt eine sehr genaue hydraulische Steuerung. Hierfür sind diese Krane mit Proportional-Ventilen ausgestattet. Dies sind Steuerventile, welche den einzelnen Funktionen eine Ölmenge zur Verfügung stellt, die genau proportional zur Auslenkung der jeweiligen Steuerehebel ist.

Die automatisch verstellbare Hydraulikpumpe liefert einen variablen Ölstrom abhängig von den Druckunterschieden im System, der von einem Pilotsignal des jeweiligen Steuerventils geregelt wird. Wenn der Kran steht, wird die Hydraulikpumpe auf „0-Förderung“ geregelt. Wenn eine Kranbewegung angesteuert wird, mit oder ohne Last, wird nur der jeweils benötigte Ölstrom gefördert.

Die Optimierung der Hydraulikanlage reduziert den Kraftstoffverbrauch, vermindert Lärm- und Abgasemissionen und spart so zusätzlich noch bares Geld!

CORMACH SERVICE

La completa soddisfazione del cliente è il nostro obiettivo primario.

Grazie al nostro ufficio di ricerca & sviluppo, alle nostre squadre mobili ed ai nostri centri di assistenza qualificati, siamo in grado di risolvere in maniera solerte ed efficace qualsiasi problematica.

I pezzi di ricambio sono sempre reperibili presso il nostro magazzino e presso i nostri rivenditori.

Grazie a questi sforzi che la CORMACH ha raggiunto nei anni, un livello di qualità e affidabilità assoluti.

CORMACH SERVICE

The satisfaction of the client is our primer target. Thanks to our technical department, to our mobile service teams and to our service centres, we are in the condition solve all possible problems, rapidly and satisfactory.

The availability of original spare-parts is always warranted, all spare parts are always available ex our or our dealer stocks.

It is thanks to this that CORMACH reached, through year of evolution, a high level of quality and reliability.

CORMACH SERVICE

Notre objectif principal est 100% de satisfaction client.

Notre bureau d'études, nos centres de SAV, nos équipes mobiles sont à la disposition de notre clientèle pour répondre, dans un laps de temps le plus court, à toute sollicitation.

Un stock permanent de pièces détachées est

disponible chez nous et chez nos revendeurs, afin de vous assurez le maximum de réactivité.

Merci à ces efforts que le CORMACH atteint dans les années, un niveau de qualité et de fiabilité absolue.

CORMACH SERVICE

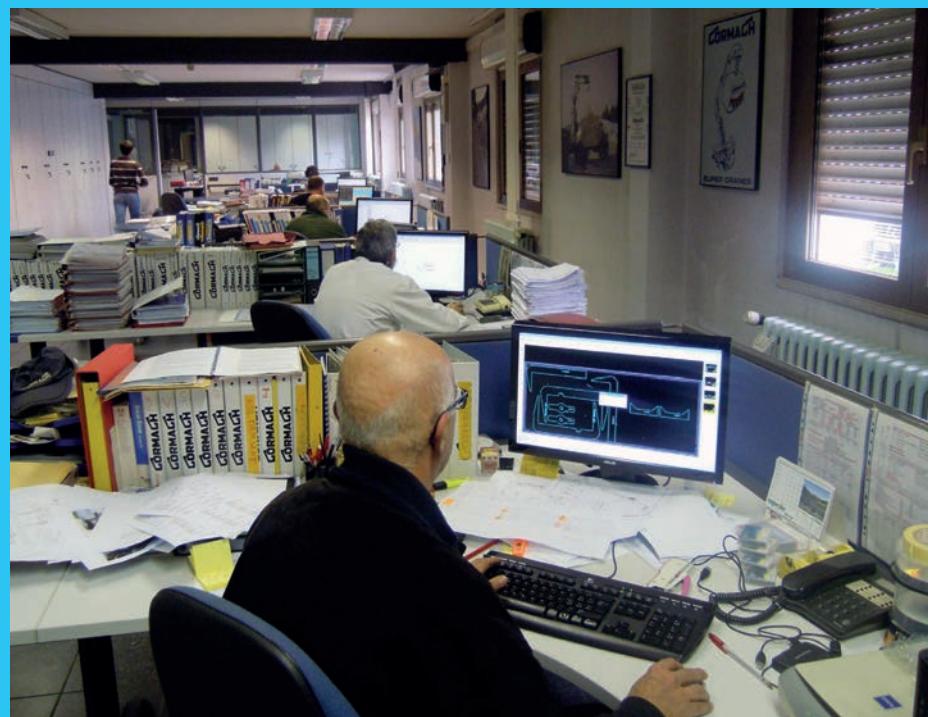

Die Zufriedenheit unserer Kunden ist das oberste Ziel.

Dank unserer technischen Abteilung, unserer

eigenen Service-Teams und unserer Service-Zentren sind wir in der Lage, sämtliche Probleme schnell und umfassend zu lösen.

Die Verfügbarkeit von Original-Ersatzteilen ist jederzeit garantiert, sowohl von unserem Zentrallager als auch von den Ersatzteillagern unserer Vertragspartner.

Aus diesen Gründen erreichte CORMACH durch Jahre der Entwicklung den hohen Qualitäts- und Zuverlässigkeitssstandart.
