

Etifiale

Labelling systems for Vial

Vial labelling

Etifiale is a special solution for high speed vial labelling. Product hoppers are used to manually load the system in-feed, the vials are conveyed and channelled to a rotary turntable with dedicated product lugs, where they are securely located for the labelling phase. Labels are applied as the products pass the labeller and the application is completed by rotating each vial in situ. Missing label and overprinting controls eject non – conforming products which are collected in a special bin. Change format of turntable and product guides is quick and easy, no tools being required for it.

Etipack reserves the right to modify according to the technical evolution, without notice. All the rights of intellectual and technological ownership are reserved

TECHNICAL SPECIFICATIONS

Production speed

Etifiale

200 vials/min. with Ø 10.25 - 12.75 mm

150 vials/min. with Ø 14.25 - 17.00 mm

125 vials/min. with Ø 17.00 - 25.00 mm

Type of labeller

Original (average working speed 40 mt/min.)

Product diameter

Ø min 10 mm - Ø max 25 mm

Length vial wrapping

min. 32 - max 75 mm

Height vial body

min. 15 - max. 55 mm

Outside reel diameter

max 380 mm

Inside reel diameter

40 - 75 mm

Machine size length - width - h

2100 x 1300 x 2100 mm

Power supply

230/240 V, 50 - 60 Hz

Electrical input

1000 W

Compressed air

6 bar
