

VKS

Attachable sweeper

The VKS range of attachable sweepers have been designed for front and rear mounting on medium and heavy carrier vehicles, and are used to remove coarse dirt from large areas.

Construction and Technology

The VKS has an open front constructed to provide enough space for the debris removal. The spraying unit ensures dust-free sweeping with its water jets. A liftable dirt collection flap with an extra dirt collection cloth prevent coarse or light debris from uncontrollably flying off. All sweepers have height adjustable wheels that guarantee the correct, individual amount of brush contact pressure. This attachable sweeper can be mounted on the front or behind the carrier vehicle.

Benefit from

- A robust and low maintenance design.
- All-year use. Various brush sets make it possible to use the VKS both in summer and winter.
- User-friendly operation. The brush is infinitely adjustable to the left and right. The integrated lifting system provides additional operational ease.

Schmidt VKS 22 / 24 / 26

Schmidt VKS 22 / 24 / 26	
Dimensions	
Brush length	2,200 mm (7.2 ft) 2,400 mm (7.8 ft) 2,600 mm (8.5 ft)
Brush diameter	600 mm (2.0 ft)
Sweeping width at 30°	1,955 mm (6.4 ft) 2,128 mm (7.0 ft) 2,301 mm (7.5 ft)
Schmidt VKS 4	
Dimensions	
Brush length	2,100 mm (6.9 ft)
Brush diameter	700 mm (2.3 ft)
Sweeping width at 26°	2,160 mm (7.0 ft)
