

Perfection firmly in your grasp.

Hand-held spray guns

Excellent surfaces.

Simple and ergonomic handling.

Versatile application.

The economic solution for optimal surfaces

Top results with **WAGNER hand-held spray guns**

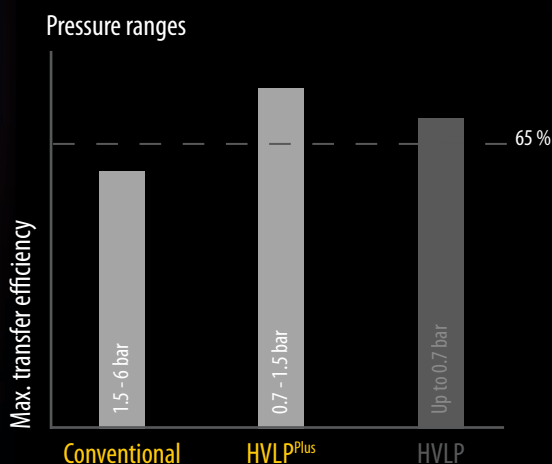

- Range of nozzle air head systems
- Performs all jobs reliably and precisely
- Variety of coating options for maximum flexibility

WAGNER offers devices, equipment and systems for all areas of industrial surface coating. Our innovative products and solutions stand out in terms of their quality, efficiency and productivity.

WAGNER hand-held spray guns can be used for almost any spray medium. Not just paints and varnishes, but also oils, release agents and much more besides. Choose between three high-performance solutions to suit your individual requirements, based on conventional, medium-pressure or innovative HVLP^{Plus} technology. A wide choice of nozzles allows ideal adaptation to each medium and efficient reduction of material consumption while protecting the environment at the same time.

High-tech quality with the HVLP^{Plus} atomization system*.

The innovative HVLP^{Plus} nozzle air head system guarantees substantial material savings plus an outstanding surface finish. Tests by the Fraunhofer IPA according to EN standard 13966-1 with an HS-2K top coat resulted in transfer efficiencies of up to 88%. This puts the transfer efficiency far above the 65% required for HVLP applications - that way the PILOT Premium pays for itself in next to no time.

*Attested by Fraunhofer IPA according to standard test procedure EN 13966-1

Exceptional performance

PILOT Premium: For an extra-fine finish.

Available with conventional atomization or HVLP^{Plus}.

Ultra-fine atomization

For top-quality surfaces.

Exchangeable nozzles

For a wide range of materials.

Solvent-resistant sealing elements

For use with aggressive coating substances.

All material-contacting parts are made of stainless steel.

Range of application

- High-quality finishing
- Car finishing
- Furniture industry
- Plastics industry

PTFE needle packing

Easy to adjust and replace from the outside.

Ergonomically designed handle

Simple and reliable handling. For right and left-handed users.

Robust aluminium body

Low weight: 490 g.

Also available in gravity flow cup version

Excellent results

PILOT trend: For top-quality surface finishes.

Available with conventional atomization
or in medium-pressure version.

Exchangeable nozzles

For a wide range of materials.

PTFE needle packing

Easily adjustable from the outside.

Ergonomically designed handle

Simple and reliable handling.
For right and left-handed users.

Robust aluminium body

Low weight: 450 g..

Range of application

- Primer application
- Standard finishing

Also available in gravity flow
cup version

The easy way to quality results

PILOT Mini: For spray-painting of small parts.

Available in medium-pressure version.

Exchangeable nozzles

For a wide range of materials.

Extra-light housing

290g plastic body.
Small, handy size
for fatigue-free operation.

Ergonomic handle

Simple and reliable handling.

All material-contacting parts are made from stainless steel. Screwthread inlets are made from stainless steel on the material side and brass on the air side. That way water-based materials can be processed with ease.

Range of application

- Spray-painting of small parts
- Repair jobs
- Decorating

Also available in gravity flow
cup version

More than just a handy extra

Competent feeding solutions from WAGNER make your hand-held spray guns complete. WAGNER double-diaphragm pumps ensure a perfectly coordinated coating performance with your hand-held spray gun.

ZIP52 finishing

- Simple operation
- Fully equipped with regulators and fine flow controller

ZIP Eco Perfect Flow

- Economy version
- Equipped with regulators and anti-pulsation tank

Material pressure tank

- Wide range of material pressure tanks
- Ideal for shear-sensitive materials

And much more...

Your WAGNER hand-held spray gun system comes complete with all the necessary components for immediate use. Needless to say, we also offer fully customized systems to suit your requirements.

Spray pack

- Consisting of
- ZIP 52 finishing
 - 7.5m hose pack
 - Premium HVLP^{plus} gun

Nozzle inserts

- Consisting of
- Air cap
 - Material nozzle
 - Needle

Repair kits

Containing complete set of gun wearing parts.

Hose pack

Specially designed for hand-held guns, consisting of material and air hose plus connections.
