## Circumferential piston pumps JRZP

### Description

Each feature of the JRZL rotary lobe pump has been designed to make pump disassembly faster, easier and cheaper. In this way cleaning and maintenance is done in the most efficient way. In addition: the forward directed seal position brings the seals into direct contact with CIP fluids.

### Your benefits

- Excellent “easy to clean” seals
- The seal position prevents product trapping
- Two shaft keys on the rotors enable quiet operation under high pressure or vibration
- Better lubrication because of oil bath, instead of a grease lubrication
- Certified according to 3A and EHEDG
