AC-217

Trolley designed to extract unpleasant odors in long-term care facilities

This battery powered trolley is born to support health care professionals to permanently eliminate unpleasant smells from long-term facilities.

Entirely made of Aisi 304 Stainless Steel, can be used to support these daily operations:

- In the main compartment the bag is being used to collect the organic waste, the purpose of which is to remove the bad smells thanks to the extraction system with filtration, subject of our patent.
- Furthermore, it permits to transport laundry bags, cleaning products, changes of linen and underwear and cleaning products for surface or body care.
