Design Process

From ideas ... to real world solutions

New product development has been a defining element throughout our history.

The nature of our products is such that they must be designed to resist the numerous challenges faced within the urban landscape.

We continuously enhance our product range and pave the way in the market by introducing unique products.

Working together with our innovative design team, we want to provide real world solutions, tailored to meeting your needs.

We offer a large range of traditional and contemporary seats and benches to provide comfortable seating in any public space.

These seats and benches are low-maintenance, weather and vandal resistant and suitable for use both indoors and outdoors.

They are available in different materials, from plastics, recycled material, steel and FSC® certified hardwood.

Visit our website
www.glasdon.com

Traditional Recycled Material Seating

Our Recycled Material Seating range offers an environmentally friendly, sustainable outdoor seating solution.

These seats and benches come in a variety of styles from British heritage to match traditional cast-iron street furniture, to wood-look benches to suit natural green spaces and modern contemporary open spaces.

■ Elwood™ Seat

DESIGN FEATURES

- Environmentally friendly recycled materials.
- Unique, realistic timber-grain finish.
- Vandal and weather resistant.
- Nine colour options.
- Co-ordinates with Sherwood™ litter bin and Glenwood™ post.

MATERIAL & COLOUR OPTIONS

Slats: Black Enviropol® material, Brown Enviropol, Timberpol® material.
 Seat Ends: Everwood™ material in Black Oak, Dark Oak, Light Oak.
 Frame: Mild Steel with an Armortec® corrosion resistant coating.

SPECIFICATIONS

Length: 1985mm
 Overall Depth: 675mm
 Seat Depth: 440mm
 Seat Height: 470mm
 Overall Height: 915mm
 Total seat weight including:
 Enviropol slats: 75kg (ground fixed)
 155kg (ballasted)
 Timberpol slats: 85kg (ground fixed)
 165kg (ballasted)
 Supplied fully assembled for immediate use.

FIXING OPTIONS

We strongly recommend ground fixing for safety and security.
 Surface fixing bolts and tamper-resistant cover caps supplied as standard.
 Concrete ballasting is also available.

Phoenix[®] Seat

DESIGN FEATURES

- Environmentally friendly recycled materials.
- Vandal-resistant robust design.
- Never needs painting.
- Superb strength.
- Minimum maintenance - needs no surface treatment.
- Weather-resistant - will not rot.
- Available with armrests.
- Co-ordinates with other Glasdon street furniture.

MATERIAL & COLOUR OPTIONS

Black Enviropol, Brown Enviropol, Timberpol.

SPECIFICATIONS

Length: 1790mm
 Seat Height: 428mm
 Depth: 574mm
 Overall Height: 702mm
 Total seat weight including:
 Enviropol slats: 75kg
 Enviropol slats: 90kg c/w 2 armrests
 Timberpol slats: 79kg
 Timberpol slats: 94kg c/w 2 armrests
 Supplied fully assembled for immediate use or in flat-pack form.

Phoenix Seat with Armrests also available

FIXING OPTIONS

We strongly recommend ground fixing for safety and security.
 Surface fixing bolts supplied as standard.
 Optional kits are available for fixing to paving slabs or to suit below-ground concrete foundations.
 Tamper-resistant cover caps are also available.

Phoenix Jubilee™ Seat

DESIGN FEATURES

- Environmentally friendly recycled materials.
- Vandal-resistant robust design.
- Never needs painting.
- Superb strength.
- Minimum maintenance - needs no surface treatment.
- Weather-resistant - will not rot.
- Long-lasting.
- Co-ordinates with other Glasdon street furniture.

MATERIAL & COLOUR OPTIONS

Black Enviropol, Brown Enviropol, Timberpol.

SPECIFICATIONS

Length: 1970mm
Depth: 780mm
Seat Height: 460mm

Eco-Rest Bench

Traditional FSC® Certified Hardwood Seating

Glasdon offer a range of wooden seats and benches. These outdoor seating products are ideal for areas of natural beauty such as parks, gardens, nature reserves and in the countryside.

All our traditional seating originate from FSC® - certified plantations.

FSC® Certified Seating on pages 14-15

- Integrates well with natural surroundings.
- Traditional design, craftsman made.
- Perfect for tough environments.
- Hardwood from FSC® - certified plantations.
- Hard wearing & long lasting.
- Complements other Glasdon street furniture.

Timber and the Environment

Timber is one of the world's few renewable natural resources and the long term interests of our forests are best served by actively supporting a well-managed timber industry which will always protect the forest from the threat of total clearance for agriculture.

What is FSC®?

The Forest Stewardship Council (FSC®), founded in 1993, is an international, non-governmental organisation dedicated to promoting responsible management of the world's forests. It operates a system of forest certification and product labelling to identify wood from well-managed forests.

Forests are inspected by independent organisations and certified against strict standards. To be given FSC® certification, a forest must be managed in an environmentally appropriate, socially beneficial and economically viable manner.

Only forests that meet these strict standards are then given FSC® certification and the timber allowed to carry the FSC® label.

For Glasdon traditional seating we use only those suppliers who can prove sensitivity to environmental considerations and who purchase responsibly sourced material.

All of our traditional seating products originate from FSC® - certified plantations.

**The mark of
responsible forestry**

Larbreck™ Seat

DESIGN FEATURES

- Hard wearing seat with a high quality appearance.
- Fully sculpted back rails provide comfort.

MATERIAL

Constructed using generous sections of FSC® Certified Hardwood.

SPECIFICATIONS

Length:	1500mm
Depth:	640mm
Height:	980mm
Seat Height:	455mm
Weight:	35kg

Supplied fully assembled for immediate use.
(Dimensions for hardwood seating may vary.)

FIXING OPTIONS

We strongly recommend ground fixing for safety and security.

Optional kits are available for surface fixing to concrete and paving slabs.
Tamper-resistant cover caps are also available.

Norbreck™ Seat

The Norbreck seat is similar in design to the Larbreck seat, but incorporates flat instead of curved armrests.

Westby™ Seat

DESIGN FEATURES

- Designed to provide maximum comfort.
- Hard wearing and long lasting.

MATERIAL

Constructed using generous sections of FSC® Certified Hardwood.

SPECIFICATIONS

Length:	1500mm
Depth:	640mm
Height:	900mm
Seat Height:	455mm
Weight:	35kg

Supplied fully assembled for immediate use.
(Dimensions for hardwood seating may vary.)

FIXING OPTIONS

We strongly recommend ground fixing for safety and security.
Optional kits are available for surface fixing to concrete and paving slabs.
Tamper-resistant cover caps are also available.

Rawcliffe™ Seat

DESIGN FEATURES

- A heavyweight traditional seat.
- The classic design features smoothly contoured scrolled arms and a high seat back.

MATERIAL

Constructed using generous sections of FSC® Certified Hardwood.

SPECIFICATIONS

CO-ORDINATING PRODUCTS

The Junior Countryside range incorporates the stylish, modern design of the full size Countryside Seat & Bench (please see Page 11), therefore offering an extensive and co-ordinated range of seating.

Munchy™ The Caterpillar Seat

DESIGN FEATURES

- Modular design can be expanded to add extra seating as required.
- No finger traps or sharp edges.
- Drainage slots ensure rainwater runs off quickly.

MATERIALS

Head/Body/Tail/Nose/Cover Caps:
Durapol® material.
Eyes: Duratec™ material.
Fixings: Mild Steel.
Free Standing Feet: PVC.

SPECIFICATIONS

Weights:
Head: 5.9kg
Tail: 3.0kg
Body: 9.4kg
Standard Model: 27.7kg

FIXING OPTIONS

The Munchy seat can either be surface fixed using concrete anchor bolts or supplied with PVC feet for a free-standing application. Sand ballasting is available for the free-standing option to provide additional security against unauthorised movement or theft.

Pixie™ Seat

DESIGN FEATURES

- Constructed from recycled rubber tyres.
- Appealing seat as well as a fun prop for imaginative play.

MATERIAL & COLOUR OPTIONS

Mushroom Stem: manufactured from 100% recycled black rubber tyres.
Mushroom Top: manufactured from rubber tyres.
Red with Yellow Spots.

SPECIFICATIONS

Seat Height: 400mm
Post length below ground: 400mm
Weight: 25kg (inc. 5kg fixing tube)
Delivered in two sections ready for self assembly.

FIXING OPTIONS

Supplied as standard with a below-ground, galvanized mild steel fixing tube. The fixing tube should be concreted 400mm into the ground for added safety and security before the seat is attached.

Lo-Co™ Steam Train Seat

DESIGN FEATURES

- Encourages creative play.
- Made from robust, impact resistant Durapol material.
- Lo-Co is suitable for indoor and outdoor use.
- Optional sticker kits.

SPECIFICATIONS

Semi-circle
 7 seats for 21 children

Circle
 14 seats for 42 children

Commemorative Plaques & Personalisation

A memorial seat is a thoughtful way to remember someone. Glasdon offer a wide selection of indoor and outdoor seats which can be personalised with a commemorative plaque that is laser etched with any dedication you would like.

Memorial Seating and Commemorative Plaques

The majority of Glasdon seats can be supplied with a stainless steel plaque that is laser etched with any dedication you would like.

The plaques are usually 150mm wide and 50mm high (plaques on the Lowther Seat and Stanford Seat are limited to 40mm high), though 200mm long plaques can be used if needed. Laser etching allows much greater flexibility for your message – alternative engraving methods are generally stuck to a fixed font and a maximum number of characters, but with laser etching we can even include simple graphics. We can also fit multiple plaques to the same seat if needed.

Some local authorities run their own schemes for the centralised purchase of memorial seats. If you would like your seat to be located on public land (such as parks, beachfronts, or cemeteries/memorial gardens), you should always contact your council to discuss whether your idea is permitted. Many authorities require specific Glasdon seats to be used – popular choices are the Stanford Seat or the Phoenix Seat, which are extremely hard wearing and require almost no maintenance. Local authorities will frequently handle the ordering process for you, arranging to receive delivery and install the seat at your agreed location.

When you order your memorial seat from Glasdon, we will take the wording and produce a computer visual that will be posted or e-mailed to you before we produce the plaque to make sure it is exactly what you want. When it is, sign the approval sheet and send it back to us, and we will have the plaque engraved as quickly as possible. The ordering process usually takes 4-6 weeks from beginning to end.

Decorative Crest Personalisation

Stanford Seat and Bench

Personalised polycarbonate plaques can be supplied to fit the rectangular recessed area on each Stanford Seat and Bench ends. In addition to this, a circular polycarbonate plaque can be fitted to the Stanford Seat. This can also be personalised with your name, message or logo.

Lowther Seat

The Lowther Seat can be personalised with graphics on the rectangular recessed area on the seat ends. In addition to this, a circular mild-steel plaque can be fitted to the Lowther Seat and personalised with your crest or logo.

For more information on this service, including prices, please telephone our Sales Office on +44 1253 600435.

Materials & Further Information

Our seats and benches are available in different materials, from plastics, recycled material, steel and FSC® certified hardwood. Offering a number of colour options, from light and dark wood, metallics and bright coloured coating.

Glasdon seats and benches are co-ordinated with our wider range of street furniture including litter bins, outdoor recycling bins, bollards and shelters.

Enviropol® Material

Enviropol recycled material was first introduced by Glasdon in 1993 and is predominantly produced from post consumer and industrial polythene. As a subsequent result of government initiatives to increase the availability of segregated uncontaminated waste for recycling, there have been significant advances in the control and separation of recyclable waste. Glasdon can therefore maintain strict controls over the recycled waste materials used to formulate Enviropol, which ensures that only those with the required physical properties are specified in the manufacture of our premium recycled product. It is also 100% recyclable when it reaches the end of its service life.

Black Enviropol

Brown Enviropol

Enviropol Benefits

The density, strength and weather-resistance of Enviropol will ensure a long, virtually maintenance-free service life. It is self-coloured and needs no painting or surface treatment. The material is resistant to chemical attack and impervious to water, frost and most corrosive substances. Enviropol is unaffected by brine, animal waste, bacteria, fungi and insects.

Everwood™ Material

Everwood is a specially formulated blend of Durapol® material, which emphasises the grain-like appearance of timber. Unlike timber it requires no regular surface treatments such as staining or painting and the material will be unaffected by brine, bacteria, rot, mould and insects. Everwood is easy to clean, requires low maintenance and can be recycled at the end of its life.

Like Durapol, it has been formulated to withstand extremes of temperature and is impact-tested in our Quality Assurance Laboratory as part of our BS EN ISO 9001:2008 test procedure.

Everwood

Timberpol® Material

Timberpol material is a durable and strong composite material containing a minimum 70% recycled hardwood sawdust and recycled polypropylene. It is a remarkably versatile product with many benefits.

Timberpol

Timberpol Benefits

A great advantage of Timberpol is that whilst it looks like wood, it does not splinter and is knot-free, making it ideal for seating. It is self-coloured, but a certain amount of natural colour fading will initially occur as with all products containing timber. This does not affect the performance of Timberpol and no painting or varnishing is ever required during its long working life.

Stainless Steel 316 Grade

Stainless Steel 316 grade (marine grade) is a highly durable and low-maintenance material. Even when located in areas of high salinity (e.g. coastal areas) it will exhibit only very slight evidence of corrosion.

No painting or coating is required, but the pristine appearance can be maintained by regular cleaning with warm soapy water. Any light staining that may occur on the surface can be removed with WD40 or an equivalent product. Alternatively, there are a number of proprietary stainless steel cleaners available. However, if used they must be low in chlorine or be spirit-based.

Armortec® Corrosion-Resistant Coating

All metal frame coatings are approved to the Glasdon 'Armortec' standard for durability and life expectancy. If the coating is damaged by scratching, corrosion will not spread further than the immediate area.

Salt Spray and Impact Tests

The Glasdon Armortec-coated post lasted 5 times longer than the other sample.

Without Armortec Coating

With Armortec Coating

Both mild steel post samples were subjected to repeated impact with a metal hammer. This was followed by six months in a salt spray cabinet in the Glasdon Quality Assurance Laboratory.

The salt spray cycle is a very aggressive test that accelerates the corrosion process and simulates long term weathering in an outdoor environment.

Durapol® Material

Durapol is an extremely robust material, which makes it ideal for use in the manufacture of various products. Durapol material is a polymer formulated to withstand extremes of temperature and is impact-tested in our Quality Assurance Laboratory as part of our BS EN ISO 9001:2008 test procedure. Durapol material will not chip or rust, is easy to clean and never needs painting.

Available in a choice of self-coloured options, including Black which contains recycled material.

Vandalex® Material

Vandalex material is an aluminium alloy engineered to produce a high modulus of elasticity, which offers increased impact absorption properties. Its anodised finish will not rust, is easy to clean and never needs painting.

Strength & Durability

All seating within the Glasdon range is rigorously tested by our in-house Quality Assurance Department for strength and durability, to ensure maximum protection against vandals and the elements.

We have accreditation with ISO 9001:2008 & ISO 14001, underlining our commitment to quality.

Base Fixing Options

Most Glasdon seating can be supplied with different fixing kits suitable for either:

Co-ordinating Products

Many of the Glasdon seats and Benches can be co-ordinated with Litter Bins and Bollards within the full Glasdon product range.

Elwood Seat with co-ordinating Sherwood™ Litter Bin and Glenwood™ Posts.

Stanford Seat with co-ordinating Brunel™ Litter Bin.

Fusion Seat with co-ordinating Fusion™ Litter Bin.

Commemorative Plaques | More Info ...

The majority of our seats can be supplied with a stainless steel plaque that is laser etched with any dedication you would like.
