

# CRUSHING MACHINES FOR CONSTRUCTION INDUSTRY AND MORE

## CRUNCHY COMPACT

The **CRUNCHY Compact** mini jaw crusher is the perfect machine for apartment construction works and renovations. Crunchy compact **crushes and directly packs light demolition remains** (bricks, rubble, tiles, pieces of travertine, concrete and any other brittle breakable material). Furthermore, thanks to the use of an autonomous vibrating sieve, the machine facilitates the disposal of the crushed material or allows its reuse in the construction site.
