

HXF double proportion computer-controlled injection molding machines

1. Clamping Unit
Reliable design with 5 pivot diagonal toggles
Twin-cabinet structure with high rigidity
Automatically adjusting the position of mould
2. Injection Unit
According to the product production needs, free choosing different diameters of screws
Control the charge back pressure through a pressure valve
Matching accumulator as to promote the injection performance
3. Control System
Configured with imported hydraulic and electrical components of high quality

HXF 系列双比例电脑控制注塑机

1. 锁模部分
可靠的5支点斜排双曲肘设计
高刚性的联体箱式结构
自动调模功能
2. 注射部分
依据制品生产需求自由选择不同直径的螺杆
采用压力阀控制预塑背压
选配蓄能器，提升注射性能
3. 控制系统
配置进口液压、电气元件，品质优越

HXS unmixed two color injection molding machines

1. With major and minor two injection components, can inject synchronously or alternately through the professional computer controlling two screw bars. So as to get the plastic products with beautiful color;
2. Also can manufacture the sandwich plastic products, and the cost is reduced;
3. Can be widely used for PP, PE ,PS and other raw materials in two color forming.

HXS 系列清双色注塑机

1. 具有主、副两个注射部件，由专业电脑程序控制两根螺杆同时或交替注射，以达到制品色彩美丽如云的特殊效果。
2. 也可以生产夹心制品，降低成本。
3. 本机可广泛用于PP、PE、PS等原料的双色成型。
