Options:
Auto greasing
Die set rack
Oil cooler
Speed adjustment
Remotic control unit
Electric back stop device
Mechanical back stop device
Pinning support mandrel
UC1, UC2, UC3

- 1) With standard dies. Crimping range can be increased with special dies.
- 2) Theoretical with 10 mm cycle
- 3) See table for die set data
- 4) Maximum opening is the total die travel. Add this value to the minimum crimping diameter of the die set used. The result is the maximum opening of the machine with die set in place.
- 5) With adapter dies

Finn-Power FP160 and FP165 models are ideal choices when crimping a variety of sizes and types of assemblies. They are especially suitable for manufacturing large fittings. Their high capacity, flexibility and complementary control options really put these machines in a class of their own. Foot pedal is included as a standard.
