

JouLiteKIT1

Product Specifications
PS-JLITEKIT-01/02-110414

The **JouLiteKIT1** is a solar lamp and charger that contains a **JouLite**, LEC30 Solar Panel and a BottleStand and 1 Phone Charge Cables. The **JouLite** can be used as a torchlight, hanging lamp, and a mobile phone charger, and at home you can insert it into the bottle Stand and use it as a study lamp. The LEC30-5V PV Solar Panel can harvest the new energy from the sun and refill your JouLite back to full in one day after its usage.

The BottleStand can be inserted in most common type of plastic PET water Bottles or Glass Bottles (the Bottle is not included in the package!). We recommend to fill the bottle with sand or small stones sothat it can provide good stability when used as study lamp.

Product HighLights

- The **JouLite** contains 30kj of energy
- Fully charges a smart phone or 2 low feature phones
- Up to 60 hours on a full charge (Lowest light output)
- Recharged via the 5V LEC30 Solar Panel or via a USB charging cable
- Splash-Waterproof and is suitable for outdoor usage even in the rain
- Electrical contacts are completely sealed and no water can leak through the contacts to the inside of the lamp that houses the battery and electronic circuit.

Please note: We recommend to always insert the Phone-Charge-Cable into the lamp so that it forms a double protection against water reaching the connectors when used in the rain.

1x JouLite150
