

Gocator

3D measurement and control, made easy

LMI TECHNOLOGIES
www.lmi3d.com

See the World Differently

- We live in a 3D world with products that have three dimensions and textured surfaces
- 3D sensors provide height and contour data, even on low contrast surfaces where 2D cameras may struggle
- 3D measurements bring value to factory automation for processing and quality control
- Measuring in 3D can be fast, uncomplicated, as well as easy to setup and interface
- At LMI, we see the world differently!
- Gocator sensors offer powerful 3D measurement that is easy for everyone!

We've made 3D easy

Feature Rich

WEB ENABLED

- Built-in web server, no separate software required
- Use a standard web browser to access the sensor
- View real-time profile data on any computer, any OS

APPLICATION READY

- Built-in measurement tools, no coding necessary
- Easy setup allows real 3D measuring in minutes, not days
- Use as a single sensor, dual sensor system, or scale up to a network of sensors

HIGH PERFORMANCE

- Scan rate up to 5000 Hz
- Resolution to microns
- Ethernet interface

FACTORY CALIBRATED

- Delivers real world coordinates, right out of the box
- Laser and camera are precision factory aligned
- Consistent reliable measurements

RICH I/O

- Interface to your existing control systems, your way
- Choose how you want to trigger and scan
- Select Ethernet, digital, analog, and/or serial data output

COMPACT FOOTPRINT

- Easily fits in small spaces
- Can be used on robotic arms
- Fits your application without costly modifications

COMPLETE SOLUTION

- Easy to use, intuitive interface to get measurements fast
- Built-in I/O
- True standalone operation for single or dual sensor systems

Quick Connection

- The onboard web server allows for **fast setup on any computer**
- Connect via industry standard **Ethernet**
- **Simple cabling** for inputs, outputs, and power
- **True standalone operation** allows you to setup and walk away - essentially you can set it and forget it
- **No hidden costs or external controllers required**

I/O cordset

Ethernet cordset

Can be wired to most existing controls with:

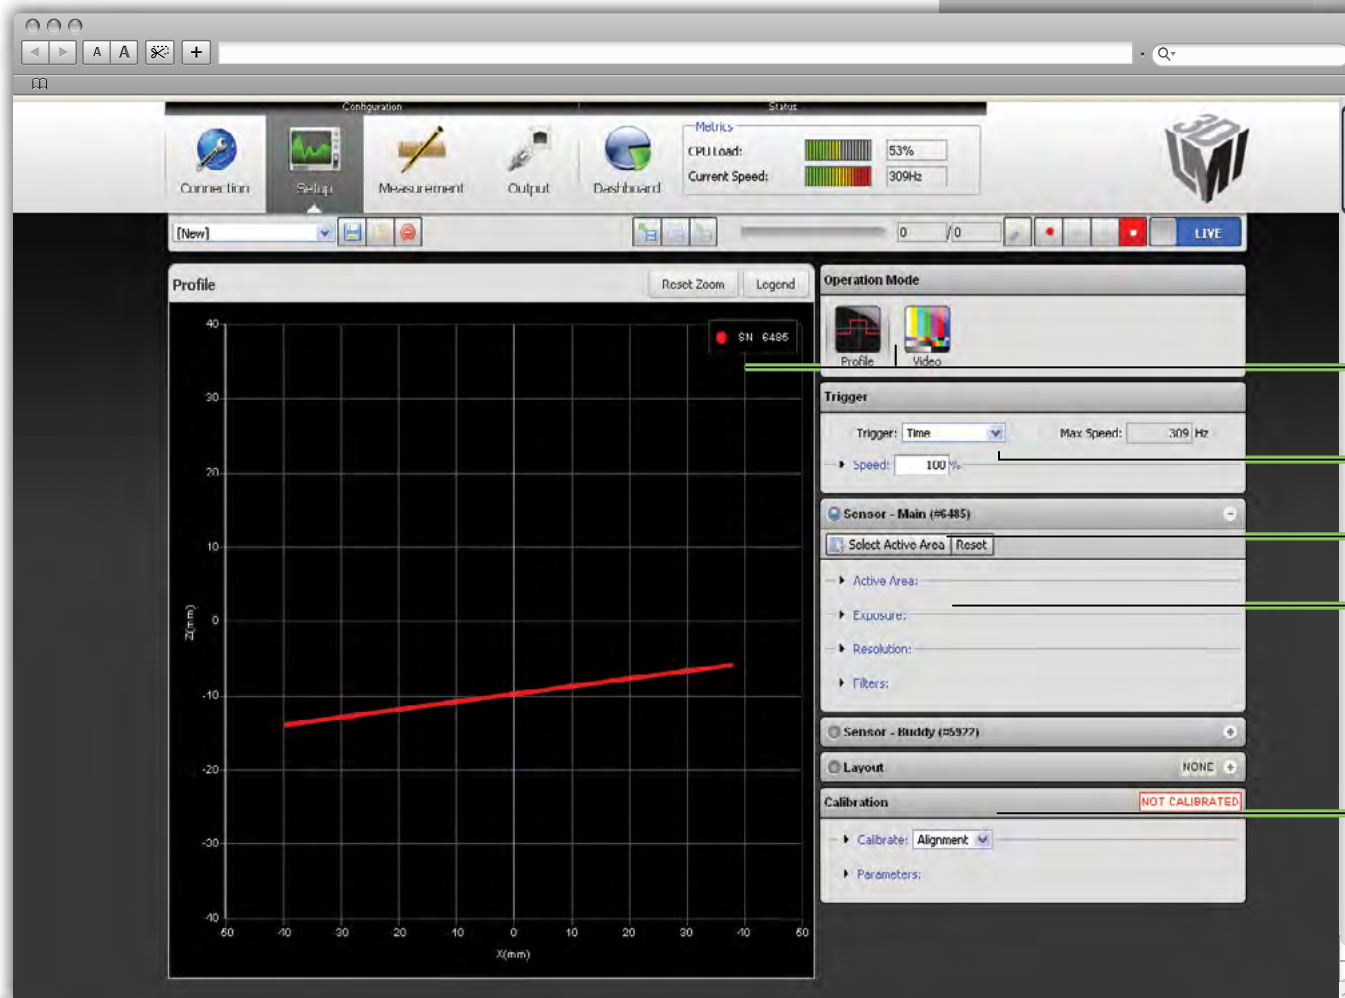

Encoder
Trigger Input
Laser Safety
Digital I/O
Serial
Analog
Power

Simple Setup

- Use your favorite **web browser** to access and control the Gocator
- With a **few mouse clicks**, you can setup Gocator to work within your control system
- **Intuitive control panels** make setup faster and easier

View live profile or video

Choose your trigger
(time, encoder, external
input, or software)

Reduce the active area to
measure at faster speeds

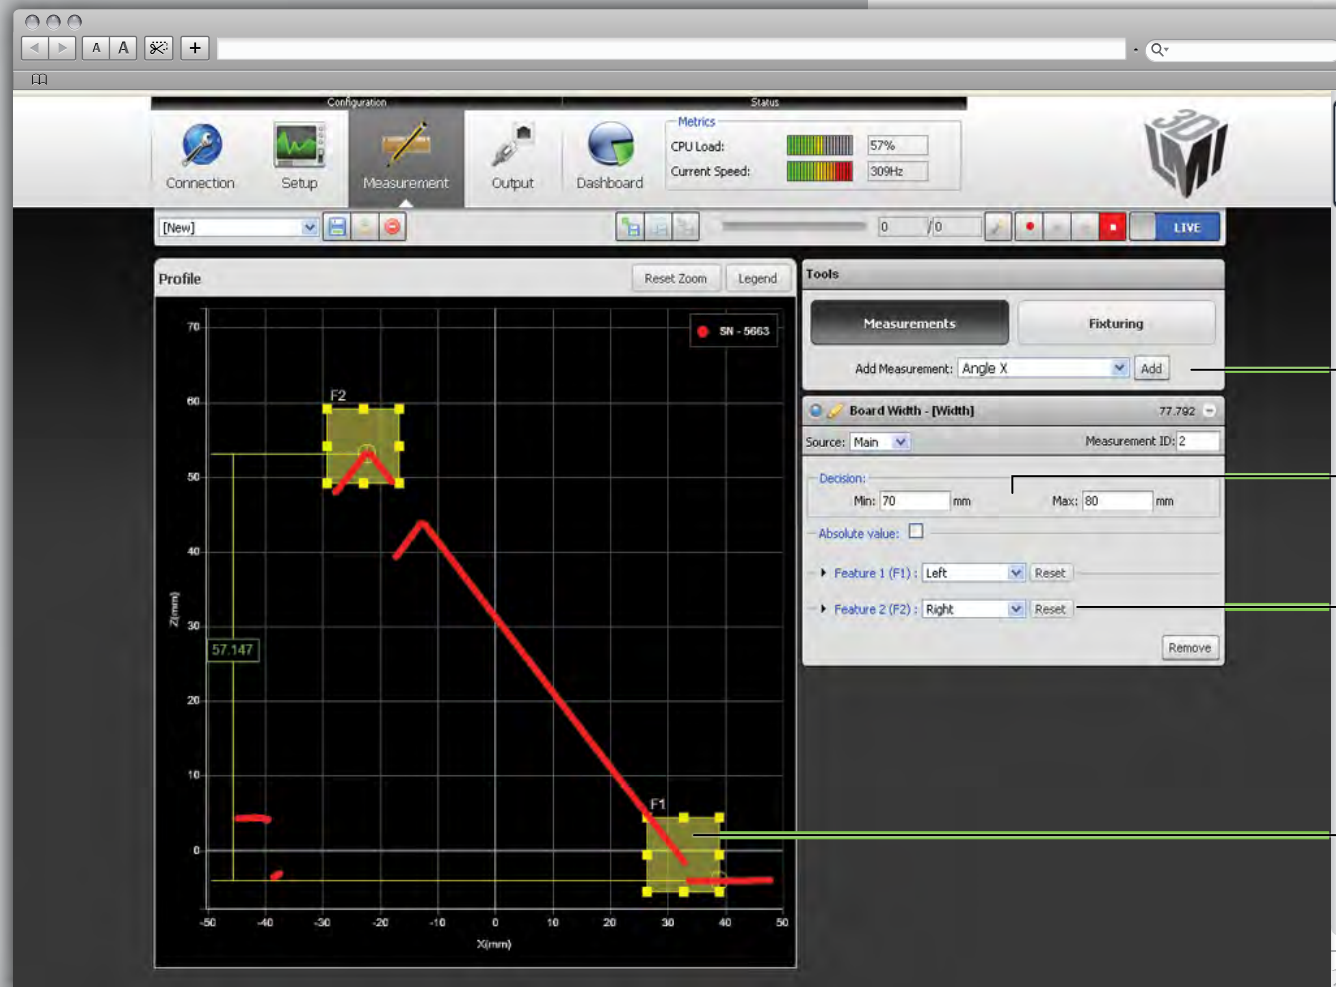

Easily set the exposure
*One of the most important
features for 3D sensors*

One button calibration for
real world coordinates

Intuitive Measuring

- Powerful **built-in tools** turn **live real-time 3D profiles** into real-time measurements with pass/fail decisions
- Select the type of measurements and **see live results with pass/fail limits**
- **Record and playback sessions** to refine tolerances or export to CSV for later analysis

Choose your measurement tools

Measure against minimum and maximum thresholds to quickly generate decisions

Choose feature points, to get precise measurements

Resize and move feature points to easily select where and what to measure

Precision Tools

- Gocator's built-in flexible tools provide a **full array of measurement types** to suit most users needs
- Use **one or use multiple tools** simultaneously to get the measurements needed for better decisions
- **NO need for highly specialized knowledge**, intensive training, or writing endless lines of code, **just point, click, and measure**
- Use the **standard tools** or **write your own script** to perform tailored calculations using "C"

```
Untitled #1 - [Script] ID: 1
Press save to store and apply script
1 char *name = "BoxArea";
2 signed long long BoxArea= -1;
3 if (exists(name))
4 {
5     BoxArea= value(name);
6 }
7 output (BoxArea,1);
8
9
10
11
12
13
14
15
Save Remove
```

Flexible Output

- Simply click on your **choice of output(s) and decision(s)**
- Gocator has the flexibility to **simultaneously output data and decisions** to a wide variety of external controls
- **Easily communicate** with your existing hardware

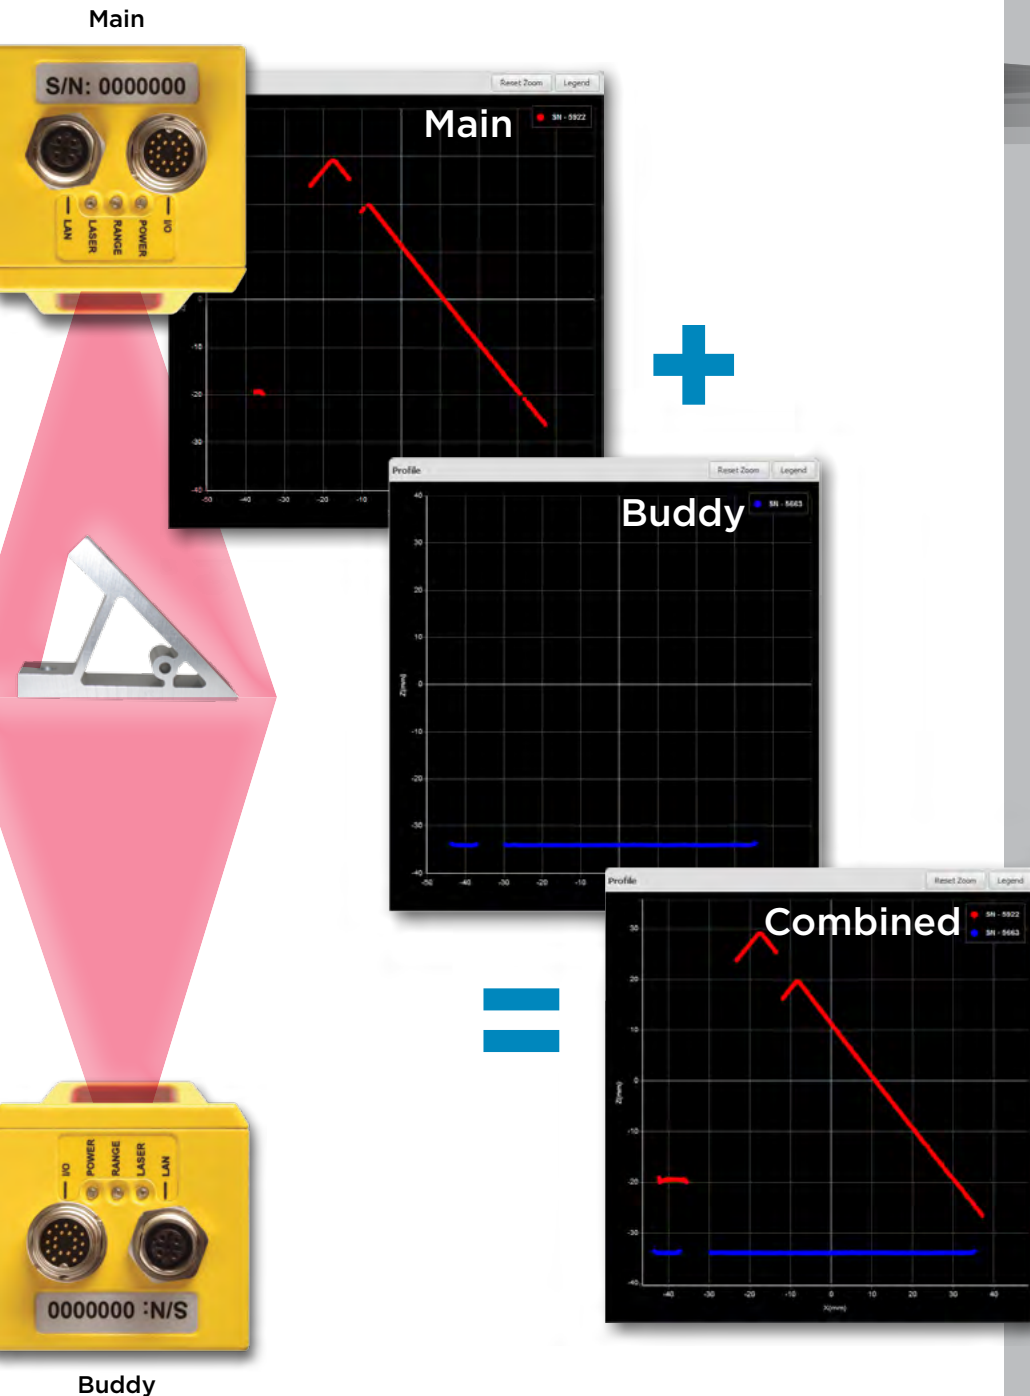

The screenshot shows the Gocator software interface with a top navigation bar containing icons for Connection, Setup, Measurement, Output, and Dashboard. A 'Metrics' section displays CPU Load at 2% and Current Speed at 0Hz. Below this is a toolbar with a 'LIVE' button. The main area is divided into five panels: Ethernet, Digital Output 0, Digital Output 1, Analog, and Serial. Each panel has 'Send:' and 'Decisions:' sections with checkboxes for 'Width' and 'Distance'. The Analog panel includes a 'Data Scale' section with 'Current' and 'Invalid' values. The Serial panel has a 'Value' section with 'Width' and 'Distance' checkboxes. A 'Pulse Width' field is visible at the bottom of the Digital Output panels.

Transmit data and decisions via RS-485 serial output channel

Measurement decisions can be output digitally to external devices

Convert measurement values and decisions to analog output signals

Send profile and measurement information to connected client computer via Ethernet

Dual Sensor System

- Gocator automatically recognizes a second sensor - we call it a **Buddy**
- Dual sensor mode seamlessly **combines profile data** from both Main and Buddy sensors as if they were one sensor
- Uses a **single GUI** with the combined profiles to measure, make decisions, and show results

Flexible Layouts:

Wide orientation

Mount a Main and Buddy side by side to measure objects that are wider than a single sensor's field of view

Staggered Orientation

Allows you to make measurements before a manufacturing process (with the Main Gocator) and after (with the Buddy) for easy pre and post process comparisons

PRE-PROCESS

Opposite Orientation

The Main and Buddy performs top and bottom differential measurements for true thickness when the object cannot be referenced to a known surface such as a conveyor

Specifications

All units in mm

Model	2020	2030	2040	2050	2070	2080
Scan Rate	Approximately 300 Hz - 5000 Hz					
Resolution (Z)	0.003 - 0.011	0.008 - 0.018	0.017 - 0.049	0.025 - 0.092	0.07 - 0.23	0.094 - 0.55
Resolution (X)	0.03 - 0.04	0.088 - 0.15	0.19 - 0.34	0.30 - 0.60	0.55 - 1.1	0.75 - 2.2
Clearance Distance (CD)	40	90	190	300	400	350
Measurement Range (MR)	25	80	210	400	500	800
Field of View (FOV)	14 - 26	47 - 85	96 - 194	158 - 365	308 - 687	390 - 1260
Laser Class*	2M	2M	3R	3R	3B	3B
Interface	100 Mbaud Ethernet					
Inputs	Differential Encoder, Laser Safety Enable, Trigger					
Outputs	2x Digital Output, RS-485 Serial (115 Kbaud), 1x Analog Output (4 - 20 mA)					
Input Voltage	+24 to +48 VDC (10 Watts); Ripple +/- 10%					
Weight	Less than 1.5 kg					
Housing	Gasketed aluminum enclosure, IP 67					

*Some models are available in other laser classes - specifications and pricing will vary.
