

GEHL®

E-SERIES SKID LOADERS

1640E | 3640E | 4240E | 4640E POWER2

In 1859, an agricultural implement company, housed in a blacksmith shop, was started in West Bend, Wisconsin. From these humble beginnings, the Gehl brand has become a major force in the compact equipment industry worldwide.

**providing an
exceptional
experience**

Since the beginning, Gehl has focused on providing solutions to our customer's needs by building quality, reliable products. With a long history of reliability and innovation, Gehl is responsive to the equipment and service needs of our customers.

With modern compact equipment manufacturing facilities in Yankton and Madison, South Dakota, and a state-of-the-art research and design facility in West Bend, Wisconsin, Gehl ensures that they are equipped with the finest in technology, tools and materials. And our top corps of engineers are skilled in designing and enhancing high-quality machines to fit the specific needs of our customers. Our equipment is modern in design and performance, but not too complicated to operate or service.

And when you purchase a piece of Gehl equipment, you have an entire organization behind you and your business. When you need support, whether it be financing, parts or service, know that Gehl will be there to provide an exceptional experience. We continually strive to preserve the level of personalized attention that Gehl began with in 1859.

GEHL®

DRIVEN TOWARDS

EXCELLENCE

E-SERIES SKID LOADERS

Building its first skid loader in 1973, Gehl has spent the last four decades enhancing their design. This drive toward excellence resulted in the E-Series Skid Loaders. These machines come fully loaded with the performance and features needed to tackle the toughest applications. Offering spacious cabs and a choice of controls, the E-Series Skid Loaders keep operators comfortable all day long.

HIGH-OUTPUT, HIGH-TORQUE ENGINES –

Supply extra horsepower where and when you need it, ranging from 24 hp (17.9 kW) to 68 hp (50.7 kW).

UNPARALLELED COMFORT – Ergonomic design and choice of operator-friendly control type for hours of fatigue-free operation.

ADVANCED HYDRAULIC SYSTEM – Allows simultaneous hydraulic functions without loss of power or speed.

STANDARD AUXILIARY HYDRAULICS – Seamlessly power attachments for the versatility and expanded capabilities you require.

Super-compact and tough, the 1640E skid loader from Gehl can go where other machines can't. A width as narrow as three feet makes maneuvering through narrow doors and alleyways easy, while a strong 850-pound (386 kg) rated operating capacity makes a huge dent in the workload.

NARROW YOUR OPTIONS – Achieve a super-compact 36-inch (914 mm) width with 5.70 x 12 tire option and 36-inch (914 mm) bucket, or a 44-inch (1118 mm) width with 8.50 x 12 heavy-duty flotation standard tires and 44-inch (1118 mm) bucket.

UP YOUR CAPACITY – Rated operating capacity of 850 lbs. (386 kg) and a lift height of 96 inches (2438 mm) brings big performance to small, cramped spaces.

GEHL

STRONG LIFT ARM provides strength, durability and excellent view of the tires and sides of the loader for increased precision and safety.

EXCELLENT HYDRAULICS provide up to 10.1 gpm (38.2 L/min) of standard hydraulic flow for powering a wide variety of attachments.

TRANSPORTS EASILY on a small truck or trailer with an overall machine weight of less than 3,000 lbs. (1361 kg), reducing transport costs.

EXTREME PERFORMANCE

SERVICE MADE EASY with a large engine cover and tilt-back ROPS/FOPS that allows access to daily maintenance points, as well as service access when needed.

POWER UP with a 24-hp (17.9 kW) Yanmar liquid-cooled diesel engine. The 1640E consumes less fuel than larger models, making a positive impact on your operation's bottom-line.

MAXIMIZE COMFORT with an ergonomic, safe operator's environment. The 1640E comes standard with T-bar "Hands-Only" control system.

Skid Loaders from Gehl are made to be compact, agile and tough. The 3640E and 4240E models are "little giants," which bring exceptional power and hydraulic performance to small spaces, providing users the edge in productivity and profitability.

LOW NOISE LEVELS – Acoustic sound package option lowers the noise levels in the operator's compartment, increasing operator comfort and productivity.

POWERFUL YANMAR DIESEL ENGINES – Put the power and performance where it counts with 35 hp (26 kW) on the 3640E skid loader and 46 hp (34 kW) on the 4240E skid loader.

INCREASED OPERATING CAPACITY – Rated operating capacity up to 1,475 pounds (669 kg) with the optional counterweight on the 4240E skid loader.

GEHL

COMPACT MACHINE width as narrow as 48.4 inches (1229 mm) and overall height just over 70 inches (1786 mm) on the 3640E.

STRONG HYDRAULICS with standard flat-faced couplers provide a high hydraulic flow up to 16.5 gpm (62 L/min) to power a variety of attachments.

POWERVERIEW[®] LIFT ARM provides strength, durability and excellent view of the tires and sides of the loader for increased safety.

MIGHTY LITTLE GIANTS

SERVICE IS MADE EASY with a combination of smart engineering and low-maintenance components. The tiltable ROPS/FOPS and large engine cover allow full access to internal components.

COUNTERWEIGHTS are optional and boost the rated load capacity to 1,175 lbs. (533 kg) on the 3640E and an impressive 1,475 lbs. (669 kg) on the 4240E.

THINK SAFETY with clear side and rear sight lines for full, expansive views for increased safety and precision placement. A roof grid section provides visibility to the bucket at full lift height.

Through constant innovation, Gehl has become a big name in the skid loader business. Featuring narrow width, high capacity and optimal comfort, the 4640E Power2 keeps your operation running smoothly.

NARROW WIDTH – Power2 model 4640E has a width as narrow as 59.7 inches (1516 mm) with optional wheel package, allowing it to fit on a standard sidewalk.

LESS NOISE – Innovative acoustical materials reduce interior cab sound levels, and engine-related components reduce noise levels, both inside and out.

HIGH-POWERED ENGINES – Advanced, high-powered, turbocharged Yanmar engine with auto-shutdown systems and grid heater starter assists to aid in cold weather starting.

GEHL

HIGH OPERATING CAPACITY from 1,650 lbs. (748 kg) on the 4640E Power2 or 1,800 lbs. (816 kg) with the optional counterweight.

EXCEPTIONAL HYDRAULICS up to 30 gpm (114 L/min) with optional high-flow power a wide variety of attachments and produce outstanding attachment performance.

ACCELERATE RAPIDLY with maintenance-free, radial-piston drive motors with high start-up torque and maximum ground speeds up to 11.9 mph¹ (19.2 km/hr).

CONSTANT EVOLUTION

STABLE RIDE is achieved with a longer wheelbase and low center-of-gravity. The HydraGlide™ ride control option² provides smoother operation over uneven surfaces.

HEAVY-DUTY DRIVETRAIN is composed of durable components. Adjustments can be made to the simple "bow-tie" chain system from outside the unit.

SERVICE IS A SNAP with a swing-open rear door, flip-up engine cover, and tiltable ROPS/FOPS that fully exposes maintenance points at the engine, battery, and filler caps.

¹ with two-speed drive option

² standard with joystick control
