

FP 1.400 DIAPHRAGM LIQUID PUMP

ADVANTAGES

- Low pulsation
- Excellent linearity
- Self-priming and can run dry
- Gentle conveying of sensitive media
- Long lifetime,
 no maintenance
- Able to transfer aggressive media
- IP 65

Please visit our website www.knf.com to get more information.

POSSIBLE AREAS OF USE

- Inkjet printing
- Medical technolog
- Laboratory technology
- Fuel cells
- Semiconductor industry
- And many more

Description	Illustration	Details
Different hydraulic connection types		Compression fittings, hose connector, push-in connector etc.

NSF National Sanitary Foundation

This certification will confirm that all of the pumps with the code .51 are certified for the use with foods/consumables.

ACCESSORIES Description	Illustration	Order no.	Details
Leakage sensor		On request	The liquid level sensor provides a digital output that denotes the presence of liquid in the motor housing.
Pressure switch		On request	Pressure switch (SPDT) to monitor pressure in the pump head. Adjustable set point. Can be used to indicate and prevent system overpressure.
Pulsation damper		On request	This versatile pulsation damper reduces hydraulic pressure pulsations and vibrations in hoses and pipes. It helps to remove pulsation which prevents the system from functioning correctly. It also protects instrumentation connected after the pump.
Anti-vibrations mounts		On request	Used to mount the pump in your system and to minimize vibration.

The performance values for the series models shown on this data sheet were determined under test conditions. The actual performance values may differ and depend in particular on the usage conditions and therefore on the specific application, on the parameters of the components involved in the user's system and on any technical modifications carried out which deviate from the standard configuration or the as delivered condition.

If individual designs have been created for specific customers on the basis of series models, other technical performance data may apply.

Before operation begins, the relevant operating instructions and/or assembly or installation instructions should be read and the safety information contained in these instructions should be noted.
