

# Reduce Downtime & Maintenance with DuraLev<sup>®</sup> Bearingless Pumps!

## No Seals, No Bearings, No Problems!

### DuraLev® 2000

4.1 bar (59 psi) 140 liters/min (37 gallons/min)

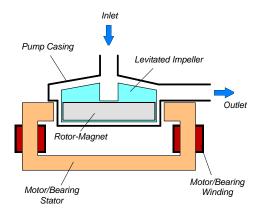

Figure 1: Schematic of the main elements of the bearingless centrifugal pump.

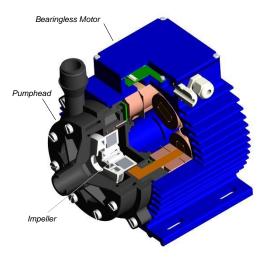

Figure 2: Cross-section of the bearingless pump motor and pump head LPP-2000.2 (PP)

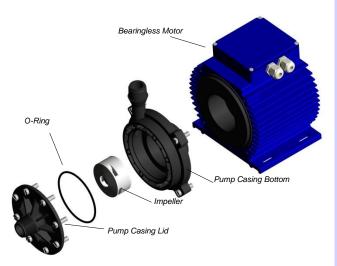

Figure 3: Disassembled pump head LPP-2000.2 (PP)

## REVOLUTIONARY MAGNETICALLY LEVITATED CENTRIFUGAL PUMP

The *DuraLev®* pump system is a revolutionary centrifugal pump that has no bearings to wear out or seals to break down and fail. Based on the principles of magnetic levitation, the pump's impeller is suspended contact-free inside a sealed casing and is driven by the magnetic field of the motor (*Figure 1*). The impeller and casing are both fabricated from chemical-resistant fluorocarbon resins and together with the rotor magnet they make up the pump head. Fluid flow rate and pressure are precisely controlled by electronically regulating the rotor speed.

#### **SYSTEM BENEFITS**

- Increased equipment uptime and low maintenance costs by eliminating bearings and rotating seals.
- No clogging or freeze-up of bearings in gold, nickel and other plating applications.
- Improves and simplifies process control by accurately controlling both flow rate and rotor speed.
- Low shear pump design.
- Dry running capability
- Proven technology in medical and semiconductor industry (MTBF > 50 years)

#### **APPLICATIONS**

- Electronics manufacturing
- Galvanic plating
- Chemical production and handling
- Ideal for shear-sensitive liquids

#### STAND-ALONE SYSTEM CONFIGURATION

The stand-alone configuration of the *DuraLev®* 2000 pump system consists of a controller with an integrated user panel allowing the operator to set the speed manually (see *Figure 7*). The speed is automatically stored in the internal EEPROM of the controller. As an option, the speed can also be set with an analog signal (see specification for *Position 3a* in *Table 2*).

#### **EXTENDED SYSTEM CONFIGURATION**

The extended version of the *DuraLev*® 2000 pump system (*Figure 8*) consists of a controller with an extended PLC interface. The PLC interface allows the speed to be set via an external signal, facilitating precise closed-loop flow or pressure control when either a flow or pressure sensor is integrated into the system (see specification of *Position 3b* in *Table 2*). A computer can be connected via a USB interface to allow communication with *Levitronix*® *Service Software*. Hence parameterization, firmware updates and failure analysis are possible.

#### ATEX SYSTEM CONFIGURATION

An ATEX certified motor together with the pumphead allows installation of motor and pumphead within an ATEX Zone 2 area (see *Figure 9*). The certified motor (*Position 2b* in *Table 2*) comes with special connectors and according extension cables (*Position 4a* and *4b* in *Table 3*). An ATEX conform solution is necessary for the motor cables to leave the ATEX area. One option is an ATEX certified cable sealing system as listed in *Table 4* (*Pos. 8*).

- ATEX certified for Category 3G and 3D (Zone 2 for Gas and Zone 22 for Dust) (Testing and certification by Electrosuisse, Switzerland, CH-8320 Fehraltorf)
- Thermal classification T4 (< 110 °C = 230 °F) for maximum liquid temperature of 90 °C / 194 °F.</p>
- ATEX marking of motor with pump head:

**(€** ☑ II 3G Ex c nAc IIC 110°C (T4)

C€ Ex II 3D Ex c tc IIIC T110°C IP67

- Explosion groups:
   Group IIA: Propane (IPA), Methane, Acetone, Acetaldehyde
   Group IIB: Ethylene, Ethylenglycol
   Group IIC: Acetylene, Hydrogen (not carbon disulphide)
- ATEX listing corresponds to UL hazardous location Class 1 Division 2.

#### LEVITRONIX® THE COMPANY

Levitronix® is the world-wide leader in magnetically levitated bearingless motor technology. Levitronix® was the first company to introduce bearingless motor technology to the Semiconductor, Medical and Life Science markets. The company is ISO 9001 certified. Production and quality control facilities are located in Switzerland. In addition, Levitronix® is committed to bring other highly innovative products like the LEVIFLOW® flowmeter series to the market.
