

Rare Earth Magnetic Bases - Multi-purpose

Part No.	Image	Drawing	Pull Strength	Mounting	Case Material	Magnet Material
----------	-------	---------	---------------	----------	---------------	-----------------

MH137-1A

10 lbs. (5 kg)	1/4-28 Integral Stud	Stainless Steel	Neodymium
--------------------------	----------------------------	--------------------	-----------

**Multi-Purpose Magnetic Base
Low Profile for Small Sensors**

MH112-1A

30 lbs. (14 kg)	1/4-28 Integral Stud	Stainless Steel	Neodymium
---------------------------	----------------------------	--------------------	-----------

**Multi-Purpose Magnetic Base
Low Profile**

MH128-1A

30 lbs. (14 kg)	1/4-28 Mounting Hole	Stainless Steel	Neodymium
---------------------------	----------------------------	--------------------	-----------

Multi-Purpose Magnetic Base

MH114-3A

50 lbs. (23 kg)	1/4-28 Mounting Hole	Stainless Steel	Neodymium
---------------------------	----------------------------	--------------------	-----------

**Multi-Purpose Magnetic Base
Low Profile**

MH214-3A with Hexagonal Wrench

50 lbs. (23 kg)	1/4-28 Integral Rotating Mounting Nut	Stainless Steel	Neodymium
---------------------------	---	--------------------	-----------

Product Purpose

**For Use With AC116-1A / AC216-1A
Magnet Mount Accelerometer**

The MH214-3A Easy Positioning Curved Surface Magnet can be adjusted so that the 2 poles of the magnet can be parallel to the data collector cable, perpendicular to the data collector cable, or in any rotational reference to the data collector cable that you like. An aluminum hex wrench is included with each magnet for easy adjustment.

magnet feet
parallel with
sensor cable

magnet feet
perpendicular
with sensor cable

magnet feet
rotated with
sensor cable
