

Electronic densometer - Densimat - CE

For density measurements on:

- milk, fruit juice, other food liquids
- oil products
- colours, paints
- galvanic baths
- pharmaceutical and cosmetics products

Specifications

Accuracy and readout

5 x 10⁻⁵

Net weight

7,5 Kg

Autocalibration with internal calibration mass

Range of the relative density measurement

0.5-2.25

Termometric probe

Pt 100 1/3 DIN, accuracy ± 0.05 °C, readability 0.1 °C

Availability of grams readout

serial output - RS 232

Mains supply voltage

220 V -15% /+10% 10 VA

Metrological approval

Dimensions

210 mm x 355 mm x 350 mm (Lx W x H)

Equipment

- 2 plungers
- 2 double wall 70 ml cylinders
- instruction manual
- dust cover

On request

flow cilinder for continuous density measurements and special pan and masses for metrologic control.
