## Systèmes radiocommunication

### Hytera Motorcycle Audio Solution

- Clear display and remote control
- Convenient installation and operation
- Choices of wireless or wired audio accessories

Riding with high speed on motorcycle, change volume or channel to get loud and clear communication could be a fatal challenge for the users. Concerned the real practice scenario, Hytera provide this Motorcycle Audio Solution for riders to enjoy the loud and clear communication on a "fast and reliable way".

With Hytera Motorcycle audio solution, Large LCD display and specific-designed control kit provide obvious indication of volume level and channel information. On-handle PPT and flexible audio accessories support a safer and more comfortable riding experience.

## Main Features

### Easy Deployment

Only add few parts like ergonomic designed bracket, wireless console and wireless adapter to work with Hytera Mobile Radio MD78X(G).

### Helmet-friendly Audio Accessories

Wired earpiece with microphone is fit to the helmet. Moreover, there is a wireless earpiece option with microphone.

### On-handle Control

With Hytera Motorcycle audio solution, particularly designed wireless console and control kit provide obvious indication of volume level and channel information.

### Safe Communication

Removing hands from handlebar could be fatal for the users. The handlebar PTT helps riders pushing to talk with their hands holding tightly.

### High Quality and Reliability

All components achieve MIL-STD/G and IP54/55 water proof standard, ensuring outstanding performance in harsh environments.

## System Structure

Wireless connection is used between mobile radio and wireless console; the wired earpiece is connected to wireless console via magnetic jack, prevents audio cable trapping the rider to evacuate during emergent situations.
