

Manufacturer of automation products for harsh environments

www.leroy-automation.com

Our main markets

Military

Linux Programmable Logic Controllers for Air defence radars.

Marine

Display units and remote input output modules for warship and aircraft carriers.

Railways

EN50155 Remote input output modules and PLC for railways embedded systems (trains, metros, trams).

Energy

Safety programmable controller for 25 kV power supply substations.

Transportation

Compact and sturdy systems for airfields, for trams, for fishing boats and pleasure boats.

Safety sites

Surveillance of Nuclear power station, military sites, broadcasting stations.

Our know-how

Mechanical packaging

Mechanical, electronic and software designs

Electronic boards

Manufacturing

Embedded software

Services

Technical support

Training

AUTOMATION

Our experience

Our main customers

Since 1983, Leroy Automation has been designing, manufacturing and marketing automation products for railways, military and industry systems.

Especially designed for harsh environments, our products are suitable for hard electromagnetic environments, for extreme thermal situations and high vibration requests.

From feasibility studies and designs to after sales service, Leroy Automation manages the complete process of the products.

Alstom Transport, Thales Air systems, SNCF (French national railway company), RATP (Parisian municipal transport system), DGA (French armed forces), KNR (Korean National railways) DCN (French navy shipbuilding division), Vinci (Fournié Grospaud Energy) ... and several hundred other companies.

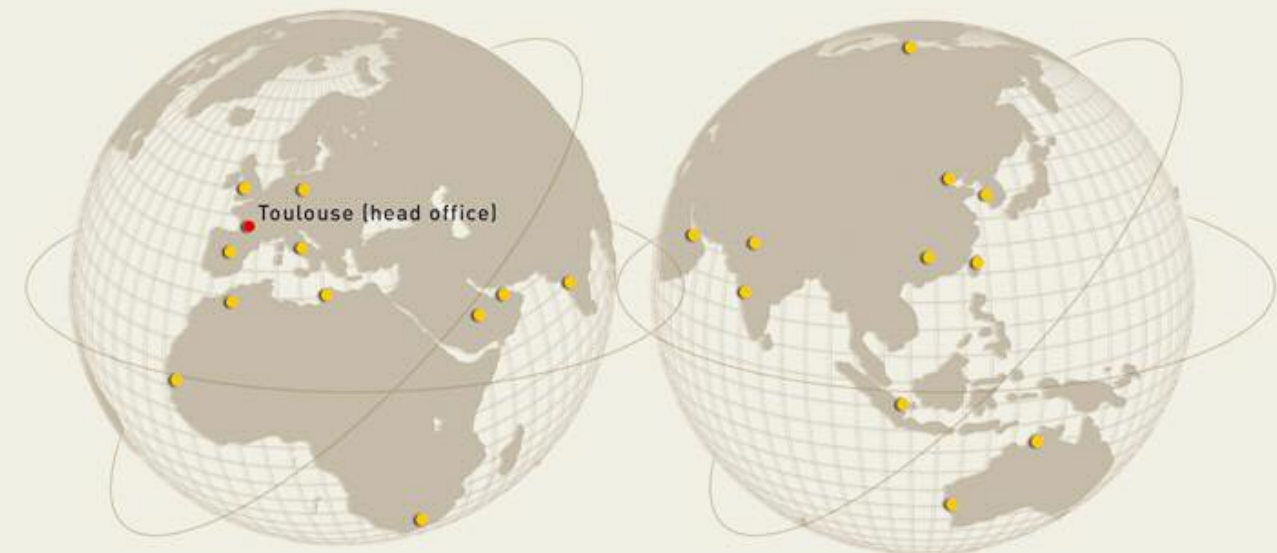

We offer a catalogue of standard products for industry and we design products to meet particular needs either by adapting our catalogue products or by designing from specific request.

Our products worldwide

The world rail speed record – At the heart of the performance:

574,8 Km/h
