

**SmartMQn Energy**  
**Power and Energy Monitor**  
**HS-EXTM (standard) &**  
**HS-EXTE (with Ethernet)**

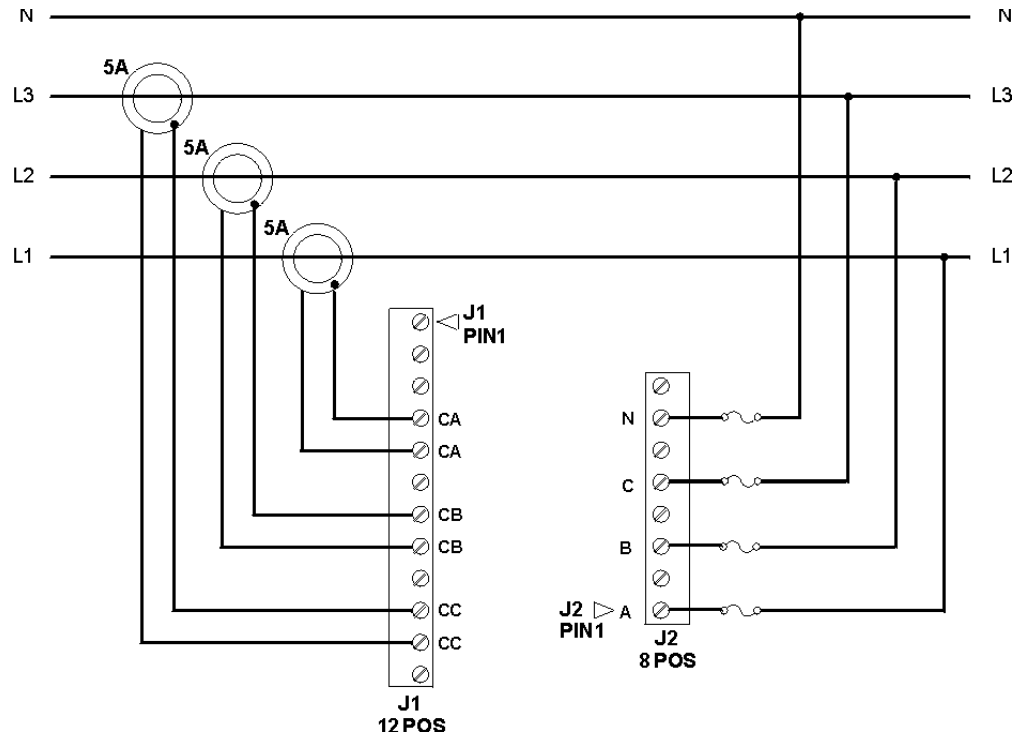

The SmartMQn Energy is a Power and Energy Monitor that requires no software to setup, and provides a variety of advanced features, including:

- 3-phase Power Monitoring with three current (0-5A CTs) and voltage inputs (480V, direct connect or PTs)
- Display of Energy and Power Values on 3.5", Backlit LCD Touchscreen
- Historical Datalogging to Removable Media, up to 2GB stored locally
- Remote Access to Live Data (Modbus, opt. Modbus/TCP) and Historical Data (via opt. EnvisionFX Software)

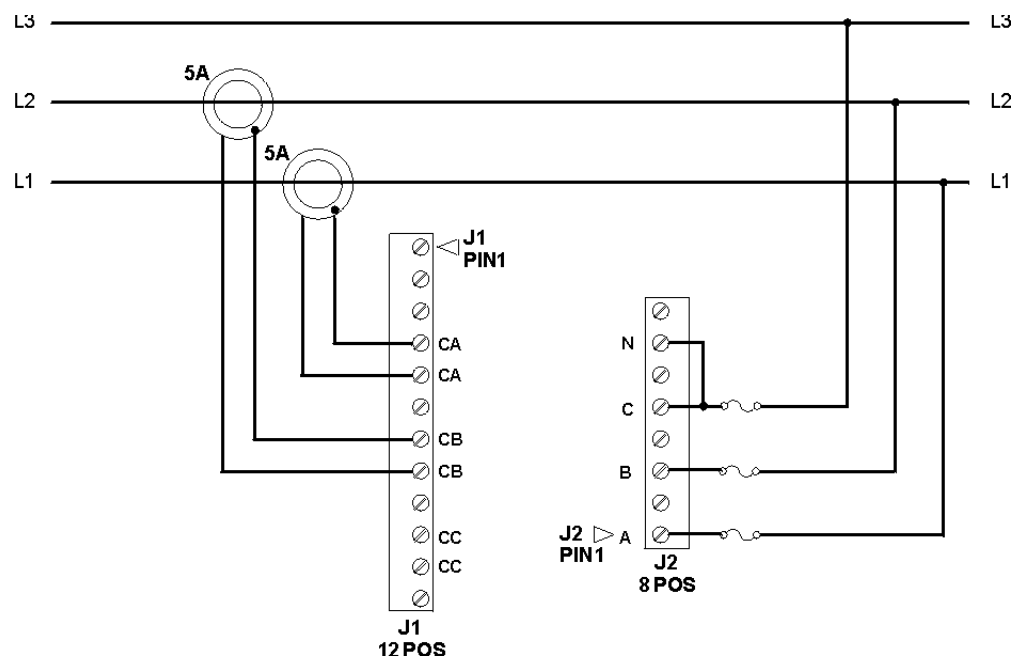

## 1 SPECIFICATIONS

| CURRENT INPUTS           |                                       | VOLTAGE INPUTS           |                           |
|--------------------------|---------------------------------------|--------------------------|---------------------------|
| Conversion               | True RMS<br>78.1K samples/sec         | Conversion               | True RMS                  |
| CT Input                 | 5A Secondary                          | PT Input (or direct)     | 480V Secondary            |
| Burden                   | 0.2VA                                 | Burden                   | 2.0Mohm                   |
| Range                    | 1 to 150% of CT Primary               | Input Range              | 40 to 600Vac              |
| Full Scale               | 150% of CT Primary                    | Full Scale               | 600Vac                    |
| Accuracy                 | <1% of Full Scale                     | Accuracy                 | Better than 1% full scale |
| RELAY OUTPUT (Form C)    |                                       |                          |                           |
| Current                  | 1A max at 30Vdc<br>0.5A max at 125Vac | Contact Voltage          | 30Vdc, Max<br>125Vac, Max |
| MEASURED DATA VALUES     |                                       |                          |                           |
| Phase A RMS voltage (Va) |                                       | Watts (W)                |                           |
| Phase B RMS voltage (Vb) |                                       | Power Factor (PF)        |                           |
| Phase C RMS voltage (Vc) |                                       | Volt-Amps (VA)           |                           |
| Phase A RMS current (Ia) |                                       | Volt-Amps Reactive (VAR) |                           |
| Phase B RMS current (Ib) |                                       | Kilowatt Hour (KWhr)     |                           |
| Phase C RMS current (Ic) |                                       | Voltage Peak (Vpeak)     |                           |
| Frequency (Hz)           |                                       | Current Peak (Ipeak)     |                           |

| GENERAL SPECIFICATIONS        |                                     |
|-------------------------------|-------------------------------------|
| Required Power (Steady State) | 200mA @ 24 VDC                      |
| Required Power (Inrush)       | 30A for 1 ms @ 24 VDC (DC switched) |
| Primary Power Range           | 10-30VDC                            |
| Clock Accuracy                | +/-7 minutes/month                  |
| Operating Temperature         | -10 to +60 C                        |
| Relative Humidity             | 5 to 95%, Non-condensing            |
| CONNECTIVITY                  |                                     |
| Serial Ports                  | RS-232/RS-485 Modbus Slave (MJ2)    |
| Ethernet Port (HS-EXTE only)  | Modbus/TCP Slave                    |
| CAN Port                      | Horner CsCAN Peer-to-Peer           |
| Removable Media               | microSD, 2GB                        |

**2 WIRING**

4-wire Wye or 4-wire Delta

3-wire Delta

### 3 DIMENSIONS, CUTOUT, AND INSTALLATION

Note: Ethernet model is 0.5" deeper

001XLE002

DC Power Connector (10-30Vdc)

CsCAN Connector

(No Power Required)

## 4 INSTALLATION / SAFETY

**Warning:** Remove power from the SmartMQn Monitor, CAN port, and any peripheral equipment connected to this local system before adding or replacing this or any module.

Use the following wire type or equivalent:

- Belden 8917
- 16 AWG or larger

When found on the product, the following symbols specify:

**Warning:** Consult user documentation.

**Warning:** Electrical Shock Hazard.

**WARNING:** To avoid the risk of electric shock or burns, always connect the safety (or earth) ground before making any other connections.

**WARNING:** To reduce the risk of fire, electrical shock, or physical injury it is strongly recommended to fuse the voltage measurement inputs. Be sure to locate fuses as close to the source as possible.

**WARNING:** Replace fuse with the same type and rating to provide protection against risk of fire and shock hazards.

**WARNING:** In the event of repeated failure, do not replace the fuse again as a repeated failure indicates a defective condition that will not clear by replacing the fuse.

**WARNING:** Only qualified electrical personnel familiar with the construction and operation of this equipment and the hazards involved should install, adjust, operate, or service this equipment. Read and understand this manual and other applicable manuals in their entirety before proceeding. Failure to observe this precaution could result in severe bodily injury or loss of life.

## 5 TECHNICAL SUPPORT

For assistance and manual up-dates, contact Technical Support at the following locations:
