DVI KVM Extenderfor LCD Displays

DVI Interface for digital transmission of the video signal.

The Digital Visual Interface (DVI) was developed to transmit the digital video signals and is today's standard interface between LCD displays and video cards.

The Voyager DVI KVM Extender series supports the DVI graphical interface and extends the PS/2 or USB keyboard and mouse up to 150m over simple CAT5 cabling or via fibre cables in multimode up to 400m and in singlemode up to 2000m. The entire digital transmission ensures original quality over the maximum distance.

▸ DVI KVM Extender for LCD Displays
▸ Extends the PS/2 or USB keyboard and mouse
▸ Single head version connected with a single CAT5 or multimode fibre cable
▸ Dual head version connected with two CAT5 or multimode fibre cables
▸ 19" rack mountable

DAXTEN®
